Pay payslips and deductions

Exact scheme outcomes

Pay, payslips & deductions (links Maths).

Before learners arrive

Open the lesson slides, choose one route pack per learner, and keep Support Cards, Vocabulary Mat and Evidence Sheet available. All teaching examples are invented. A pair can work with an adult instead. No live workplace contact, sign-up, real payslip or real contract is required.

Minutes	Action
0–5	Agree a response mode and recall one useful idea.
5–13	Read the invented model; explain the key words; check understanding.
13–23	Work as reader and checker, swap roles, then answer the hinge privately.
23–35	Each learner gives their own response using a chosen route.
35–40	Review evidence, give one next step, keep the reply and save.

Main ideas

Find gross pay, tax, National Insurance and net pay on an invented payslip.

Subtract the labelled deductions and check the net pay.

Explain one sensible action if a pay figure is unclear.

Quick model

The invented payslip shows gross pay of £1,000. Gross means before deductions. The tax line is £100 and the National Insurance or NI line is £50. These amounts are supplied for practice; we are not working out real tax or NI. First add the two deductions: £100 + £50 = £150. Next subtract the total from gross pay: £1,000 - £150 = £850. The £850 net-pay line is the amount left in this example.

Cover keys and help

Check understanding

On practice month A, which is the amount left after the two supplied deductions: £1,000 or £850? Explain the label. Key: £850. It is net pay, which is the amount after deductions. £1,000 is gross pay, before deductions.

Hinge key

Practice month B shows gross £800, tax £80 and NI £40. Which calculation finds net pay?

Key: C. Each learner answers privately. If either adds deductions or omits NI, re-model the labelled lines, let the learner subtract both amounts with an aid, then use the parallel hinge. Continue to the independent task after the learner explains net as after deductions; otherwise retain the supported frame and adult check.

Parallel check

A new invented slip shows gross £500, tax £50 and NI £20. What is net pay?

Key: A. £50 + £20 = £70; £500 - £70 = £430. If the answer is still unclear, read and match one labelled line at a time, use the supported frame and record the help used. Do not give the answer then mark it independent.

Pair and individual work

Use practice month A. One learner is the reader: point to gross pay, tax, NI and net pay and read each amount. The other is the checker: match each label to its meaning. Each learner records their own four labels in their book or usual response mode. Together add tax and NI, then subtract the total from gross pay. The reader explains the first calculation; the checker explains the second. Check by adding back. Each learner keeps their own working; the pair does not submit one shared answer. Swap roles for practice month B: gross pay £800; tax £80; NI £40; net pay is not supplied. Find total deductions, calculate net pay and use the add-back check. These are also invented practice values. Each learner privately answers the hinge. Compare methods afterwards only if both agree. An adult can be the partner, or the learner can point, speak or use an aid.

In your book or usual response mode, label the four lines on practice month A and complete: Gross is before _____. Net is after _____. Use practice month B. Record £80 + £40, then £800 minus that total. Label the answer net pay and check by adding back. A different invented slip shows gross £600, tax £60, NI £30 and net £520. Decide whether the arithmetic matches. Show your check and write or say a calm question to the person responsible for pay. Do not decide from this exercise what real tax should be. Keep your first attempt. Add one next step, make a correction or explanation in the same colour, on the same page or usual mode, then save your own response.

Access and follow up

Use voice, writing, pointing, a usual aid, typing or an exact scribe. Read back and correct. Plan in any language. Ask a trusted adult privately; pass, pause and return with support. No personal work or family story is needed.

Keep the first try, one next step and a reply. Save actual evidence, not a model copied as personal experience. Use Staff Answers for detailed keys. VF verbal feedback · WS worked with support · I independent · NS next step · // self-edit · ? read this back to me · E saved evidence · R responded. Keep the first try, one NS and the learner reply. Record R only after Voice and Audience are clear and the learner responds to NS in the same colour, on the same page or usual mode. Offer to the Communication portfolio. Staff confirm any mapping to the unit award; no award completion is implied.

Where this leads

Read workplace information, explain a safe decision and ask for help when information is unclear.
