Contracts and solving workplace problems

Exact scheme outcomes

Contracts & the law (basics).

Problem-solving in the workplace.

Before learners arrive

Open the lesson slides, choose one route pack per learner, and keep Support Cards, Vocabulary Mat and Evidence Sheet available. All teaching examples are invented. A pair can work with an adult instead. No live workplace contact, sign-up, real payslip or real contract is required.

Minutes	Action
0–5	Agree a response mode and recall one useful idea.
5–13	Read the invented model; explain the key words; check understanding.
13–23	Work as reader and checker, swap roles, then answer the hinge privately.
23–35	Each learner gives their own response using a chosen route.
35–40	Review evidence, give one next step, keep the reply and save.

Main ideas

Find the role, hours and pay in a fictional contract extract and identify one point to check.

Explain that a contract is an agreement with terms and cannot simply remove legal rights.

Use pause, check, ask and report to choose a safe response to a fictional workplace problem, giving a reason.

Quick model

Invented example: a worker is told to prepare two paper packs. Each pack needs one large card and one paper strip. There are two large cards but only one strip. The order cannot yet be completed as written. Pause: do not say both packs are complete. Check: read the order and count the materials once. Ask: 'The order needs two strips. I have one. Where should I get the other strip?' Report: tell the supervisor what has been checked and what remains missing.

Cover keys and help

Check understanding

In the fictional extract, which clause tells us the worker's main task? Is the short extract the whole contract? Key: The Role clause: arrange materials and check packs against the order. No; the extract says other terms are not shown, and a contract can include more than the written extract.

Hinge key

The order and spoken instruction give different strip counts. What is the best next action?

Key: B. Each learner chooses privately and gives a reason. If either chooses A or C, or cannot explain the conflict, re-model checking the two instructions and asking one clear question. Use the parallel hinge before independent work. If both choose B with a sound reason, continue.

Parallel check

Only one of the two packs has been checked. Which report is supported by the facts?

Key: C. Look for an accurate gap and safe next action. If unsure, show one checked pack beside one unchecked pack, read the order again and ask for a supported report. Record the support; do not infer independent understanding.

Pair and individual work

Choose reader and checker roles. An adult can be the partner, or each learner can respond privately. Ready-cut paper only; no real tools, stock, customers or deliveries. Reader locates the role, hours and pay in the contract extract. Checker points to the clause that supports each answer. Swap after the first two items so both locate a term. Each learner chooses one missing detail to ask about, such as break arrangements or full holiday terms. Say the question; the partner checks that the extract does not already answer it. Use scenario A. One learner reads the order and the other checks the count. Agree a safe next action using pause, check, ask and report. Swap roles and use scenario B. Each learner records their own chosen action, reason and one evidence clue. Agreement between the pair does not replace either learner's own response. No speed score.

In your book or usual response mode, record one term about the role, one about hours and one about pay. Point to the relevant clause for each. Write or say one question about information missing from the extract. Explain why getting the answer would help the worker. Choose scenario A or B. State the problem using only the facts. Give a safe action for pause, check, ask and report, and explain why your solution is useful. Complete: 'A contract cannot simply remove legal rights because ...' Use the explanation or ask for a readback if needed. Review your own evidence. Keep a missing step visible and add one next step after feedback. Do not copy the worked example as an action you actually took.

Access and follow up

Use voice, writing, pointing, a usual aid, typing or an exact scribe. Read back and correct. Plan in any language. Ask a trusted adult privately; pass, pause and return with support. No personal work or family story is needed.

Keep the first try, one next step and a reply. Save actual evidence, not a model copied as personal experience. Use Staff Answers for detailed keys. VF verbal feedback · WS worked with support · I independent · NS next step · // self-edit · ? read this back to me · E saved evidence · R responded. Keep the first try, one NS and the learner reply. Record R only after Voice and Audience are clear and the learner responds to NS in the same colour, on the same page or usual mode. Offer to the Communication portfolio. Staff confirm any mapping to the unit award; no award completion is implied.

Where this leads

Read workplace information, explain a safe decision and ask for help when information is unclear.
