Construction making knowledge organiser

Design and Technology LAUNCH Spring 2 Week 3 Thursday 11 March 2027 P1 Year A

Weekly outcome verbatim: CONSTRUCTION: make, adjust and improve.

I can make from my checked plan and use real checks to improve the work.

Today I can

[ ] I can follow the approved cut and join with safe support.

[ ] I can stop and compare my work with my plan.

[ ] I can log each real adjustment and explain why it helps.

The problem and purpose

Invented client Sam needs one paper prompt card, 80 mm wide by 60 mm high, upright and readable on a level table. Make a small card stand. It should hold that card for 30 seconds with hands away, fit within a 160 mm by 120 mm overall table area including the channel, let the card lift out by hand and have smooth safe edges. The default body base is 120 mm by 80 mm. These are design targets. Check the actual stand. No heavy object or extra load is used.

The default plan

Default: one suitable thin card body 120 mm wide by 260 mm long. Mark folds across the width at 80, 160 and 240 mm from the same short end. This gives three 80 mm faces and a 20 mm joining tab. Fold a triangle and tape the tab inside the first face at the top seam. Add a 100 mm by 30 mm retaining strip with long folds at 10 and 20 mm from the same long edge. Fold a shallow U channel. Tape its back flange at the bottom of the front sloping face. The shelf projects out and the front stop faces upward toward the card. Leave the stand ends open. Use the actual approved revised plan if it differs.

A useful order

Retrieve the design. Check tools and support. Mark and recheck. Cut as agreed. Try the parts. Join. Stop and check. Make a safe change if needed. Log what happened.

Evidence to keep

Keep the actual work and the true stage reached. Record checks, each real change and why, pupil actions and adult help. An adult example is not your own practical evidence.

Use your book first. Rehearse in any language. A calm pause starts with tools down and work safe.
