Evaluation activity prompts

Design and Technology LAUNCH Spring 2 Week 4 Thursday 18 March 2027 P1 Year A

1 Retrieve and clear

Use your actual item, approved design and change log. Wait for adult checks of edges, joins, tools and level table.

2 Check strength

Use one actual 80 mm by 60 mm lightweight paper card. Central in the U channel. Hands away for 30 seconds after clearance. Stop at the first concern. Record what happened.

3 Check finish

Look at safe edges, neat folds, flat tape, open channel, loose bits and the card message. Let the adult handle suspect parts.

4 Improve and recheck

Agree one useful safe change linked to a real finding. Make it with support. Repeat the same one-card check and record the actual result.

5 Explain and keep

Keep before, change, why, after, support, date and next step. Extra-card comparison is optional Stretch only after a successful baseline and new adult clearance.

No materials

With no actual stand or safe test space, use the model brief and spoken checks. Point, speak or sign a strength check, a finish check and a proposed improvement with a reason. Rehearse the stop routine with empty hands. An adult may scribe exact confirmed words. Label this model evaluation or planning. Actual load testing, physical improvement and the recheck stay pending unless performed.
