Strength test and repair safety brief

Design and Technology LAUNCH Spring 2 Week 4 Thursday 18 March 2027 P1 Year A

Follow the actual adult-approved route. All tests are gentle tabletop checks with lightweight paper cards. A quiz answer is not permission to use tools or add load.

1 Use the intended one lightweight paper card first. A normal-use load test does not need a heavy weight or force.

2 The adult clears actual joins, edges, tool return, table and support before the test. Keep hands away while observing; no one steadies the stand.

3 Stop for slip, tilt, bowing, loose join, damage, concern or the adult signal. Remove the load safely as directed. Let the adult handle damaged or suspect parts.

4 No pushing, shaking, dropping, heavy objects or tests to failure. No hot glue, heated tools or power tools are used.

5 Any repair uses only the actual approved hand-tool method and support. Close scissors and put them down before speaking or pausing. Ask before a new cut or join.

6 After a change, return to one card first. Record a stopped or unperformed test honestly. Do not add another card to see what happens after a warning.

7 An actual approved adhesive join must complete its full label cure before testing. The adult checks the actual instructions; never guess a cure time. A new adhesive repair keeps the recheck pending until full cure. The default uses cold paper tape.

Safe stop routine

Tools down. Stop the test at the first concern. Follow the adult to remove the load and inspect. Agree one safe improvement. Recheck with one card first after clearance. Resume only when the adult confirms the route.

No item or test space

With no actual stand or safe test space, use the model brief and spoken checks. Point, speak or sign a strength check, a finish check and a proposed improvement with a reason. Rehearse the stop routine with empty hands. An adult may scribe exact confirmed words. Label this model evaluation or planning. Actual load testing, physical improvement and the recheck stay pending unless performed.
