Teacher and cover plan

Design and Technology LAUNCH Spring 2 Week 4 Thursday 18 March 2027 P1 Year A

Evaluate card stand strength and finish

Weekly outcome verbatim: CONSTRUCTION: evaluate strength and finish.

LAUNCH Weekly Spring row 206. Year A. Resilience & Change. One 40-minute lesson for a small group aged 14 to 16.

Prepare

Retrieve actual approved designs, build plans, items or labelled mock-ups and change logs. Prepare one actual lightweight paper card 80 mm by 60 mm, a level clear table, a timing method and the finish check. A non-specialist cover adult may teach model evaluation if a real item or safe test route is unavailable; practical evidence then stays pending.

Before testing, check edges, joins, channel, tool return and learner support. Do not touch suspect edges; the adult handles damage. Use only the agreed hand-tool repair route. Default cold paper tape needs no heated tool. Actual approved adhesive alternatives wait for full checked label cure. Do not invent times. Hot glue, power tools, heavy loads and tests to failure are excluded.

Timing

Stage	Minutes
Arrival	5
Starter	3
I do	5
We do	7
We do 2	5
Independent	8
Review	4
Exit	3

Total 40 minutes. Demonstration, inspection and recheck fit inside stages. Independent means an activity stage with the agreed supervision.

Retrieve the work and compare checks

Design and Technology LAUNCH Spring 2 Week 4 Thursday 18 March 2027 P1 Year A

Arrival 5 minutes

Say and do: Retrieve actual approved records and work. Keep a Week 2 mock-up labelled as a mock-up, and an adult model labelled as a model. Read the one-card purpose. Check actual joins, edges, table clearance, tool return and support before any handling or test. If the item is missing, use the model evaluation route without inventing earlier making. Use the last minute for a calm settling pause.

Check and response: Ask what the intended load is. Expect one actual lightweight paper card, 80 mm by 60 mm, not a real device, heavy object or maximum-load challenge.

Starter 3 minutes

Say and do: Compare strength with finish using the two-row card. A neat tape surface alone does not prove the stand holds the card. A standing card alone does not prove every edge is safe. Use actual observations only after clearance. Read aloud or point to one check at a time.

Check and response: Ask which check belongs to strength: card stays supported during the timed test, or tape lies flat. Expect the first. Tape quality is a finish check, though joins can affect strength too.

Model and guide the normal use test

Design and Technology LAUNCH Spring 2 Week 4 Thursday 18 March 2027 P1 Year A

I do 5 minutes

Say and do: Demonstrate on an adult teaching stand or narrate a clearly labelled model if none is available. Put tools down and inspect the work. Place one 80 by 60 mm paper card centrally in the channel against the slope. Observe hands away for 30 seconds only if cleared. Show how to record actual time and result. Stop immediately if a concern appears; do not manufacture a fault. Remove the card and inspect folds, joins and channel. Model one observation, then fade the next question to the pupil.

Check and response: Ask for one stop sign and the safe response. Expect slip, tilt, bowing, loose join, damage, concern or adult signal; stop and follow the adult, without adding load.

We do 7 minutes

Say and do: Guide a baseline one-card test only after the actual item and route are cleared. One pupil may direct safe adult handling; record the roles. Keep card position central, table level and timing target 30 seconds. Remove and inspect. Use the finish list and record a real finding or that a feature was met. Do not call an adult-model demonstration pupil testing. Plan in any language and confirm scribed words.

Check and response: Check that the entry gives an actual observation, not a copied target. If the stand needs a safety repair before any test, record baseline test stopped or not performed and why. Do not invent a before result.

Hinge improvement and fair recheck

Design and Technology LAUNCH Spring 2 Week 4 Thursday 18 March 2027 P1 Year A

We do 2 5 minutes

Say and do: Hinge answer is no. Stop at the first concern, remove the load as the adult directs and inspect before any approved change. Never add load after a stop. Parallel check: after a repair, should you start with three cards? No. Recheck with one intended card first, after adult clearance. If either response is missed, rehearse tools down, stop, ask and one-card recheck before practical work resumes.

Check and response: Move on when the pupil explains the stop sign, adult check and one-card restart. A quiz answer does not clear the actual item or optional comparison.

Independent 8 minutes

Say and do: Keep approved supervision; independent is the timetable stage, not tool permission. Agree one useful safe improvement linked to a real finding, such as a neater secure tape end or corrected channel alignment. Do not deliberately weaken work to make a change. After repair, the adult clears the item and the same one-card test comes first. Log before, change, why, after result and support. If no safe improvement is suitable, keep the next step pending. Optional Stretch extra-card comparison is only after a successful baseline and separate adult clearance, maximum three identical paper cards total, with 30 seconds and removal/inspection between stages. It is never required. A new adhesive repair keeps the recheck pending until the full cure required by the actual checked label. Do not guess a time.

Check and response: Check real improvement and recheck evidence. If only a proposal was made or the test was not completed, label it accordingly. A stopped test is useful evidence and does not require a forced pass.

Review the actual evidence

Design and Technology LAUNCH Spring 2 Week 4 Thursday 18 March 2027 P1 Year A

Review 4 minutes

Say and do: Count and return any repair tools before review. Let the pupil explain one strength observation and one finish finding, privately if preferred. Compare the same one-card conditions before and after. A stopped baseline or missing recheck stays explicit. Confirm roles and exact pupil words. Extra-card counts show only this comparison, not a universal capacity. Use the last minute to store the item and log together.

Check and response: Ask what changed and why, what the actual recheck shows and what remains uncertain. Do not mark strength or finish as passed from a model picture or an unperformed test.

Exit 3 minutes

Say and do: Retain the actual dated evaluation, finish list, improvement log, support and evidence location for the closing review next week. Object-only sketches or a private school-approved object photo may support the record; no people or identifiers and no public upload. A presentation of planning is not a practical test.

Check and response: Evidence records actual strength and finish checks, a real approved improvement and its reason, the actual recheck or honest gap, and support. The lesson does not certify the unit award or a maximum load.

Keep for the closing review

Retain the actual item or honest unfinished record, baseline, finish check, real improvement and why, recheck, date, support and location. Do not substitute an adult model or optional extra-card result for the core evidence.

Access and adult support

Design and Technology LAUNCH Spring 2 Week 4 Thursday 18 March 2027 P1 Year A

Cognition and Learning

Read one check at a time. Use strength and finish as two clear groups. Model observation, change, reason and recheck, then fade to sentence starts. Keep actual results separate from target numbers.

Communication and Interaction

Offer pointing, speech, signing and pupil-directed adult handling. Give thinking time. Read back any scribed finding so the pupil can correct it. Keep the actual roles visible.

SEMH

Use private feedback and an optional calm pause. A pause starts with tools down and work safe. Treat a stopped test as information, not a personal failure. No forced public display or personal disclosure.

Sensory and Physical

Check seating, grip and line of sight. Use a large view, adult handling directed by the pupil or a no-touch model evaluation. Do not force contact with suspect edges or unstable work. Record practical actions still pending.

Literacy and Numeracy

Keep one-card count and actual seconds in separate fields. Read 80 mm by 60 mm as card size. Use before and after sentence starts. Planned 30 seconds is not an actual timing unless observed.

EAL

Plan in any language. Pair strength, finish, load and stop with the actual part or a gesture. Rehearse short observation and reason phrases. Preserve meaning through confirmed scribing.

Materials free fallback

With no actual stand or safe test space, use the model brief and spoken checks. Point, speak or sign a strength check, a finish check and a proposed improvement with a reason. Rehearse the stop routine with empty hands. An adult may scribe exact confirmed words. Label this model evaluation or planning. Actual load testing, physical improvement and the recheck stay pending unless performed.

Where this leads

Product testers use a fair normal-use check and record limits. Makers use those findings to improve joins, handling and finish before the product is used.
