Teacher and cover plan

Design and Technology LAUNCH Spring 2 Week 5 Thursday 25 March 2027 P1 Year A

Cost a card stand and review progress

Weekly outcome 1 verbatim: Cost my product and present it (links Enterprise).

Weekly outcome 2 verbatim: Review D&T progress and add unit award evidence.

LAUNCH Weekly Spring rows 207 and 208. Year A. Resilience & Change. One 40-minute lesson for a small group aged 14 to 16.

Prepare the review

Retrieve actual design, plan, mock-up or product, change log and Week 4 evaluation. Agree invented material allocations from real records. Prepare the 45p two-row model, own costing sheet, two-minute presentation card and closing six-outcome grid. Five weeks have six outcome rows. Use the exact scheme fields; narrative names only the unit award.

A non-specialist cover adult can read the worked cost and support the private talk. No new cutting, joining, powered or heated tool, real sale or website research is needed. A missing item can use a labelled planned-product estimate and an actual observed oral presentation while practical gaps stay pending.

Timing

Stage	Minutes
Arrival	5
Starter	3
I do	5
We do	7
We do 2	5
Independent	8
Review	4
Exit	3

Total 40 minutes. Two-minute talks fit within Independent 8 and Review 4, not extra time. Use a short private rota; if observation does not fit, mark remaining talks pending.

Real records and resource values

Design and Technology LAUNCH Spring 2 Week 5 Thursday 25 March 2027 P1 Year A

Arrival 5 minutes

Say and do: Retrieve the actual design, cutting list, model or product, change log and Week 4 evaluation. Read both exact weekly outcomes from the plan. Narrative calls the award only the unit award. Missing work is marked missing; an adult model may support a labelled estimate but never replaces a pupil record. Offer a calm settling pause inside the stage.

Check and response: Ask for one real record and one thing it shows. If absent, identify the gap and a next opportunity; do not invent earlier success.

Starter 3 minutes

Say and do: Explain material allocation with the model sheet. A 210 by 297 mm sheet holds the 120 by 260 mm body, rotated 30 by 100 mm channel and 80 by 60 mm test card in its remaining 90 mm strip. The whole sheet includes offcuts. Retained mock-up or test card is not charged again each week. Actual different material uses a recorded adult-agreed value; unknown quantity is an estimate.

Check and response: Ask whether the test card needs a second charge after pricing its whole issued sheet. No. Model values are not supplier quotes or actual spending.

Cost modelling and presentation planning

Design and Technology LAUNCH Spring 2 Week 5 Thursday 25 March 2027 P1 Year A

I do 5 minutes

Say and do: Model the two cost rows with quantities and units. The 30 cm tape model is an issued allowance including offcuts, not a claim that a pupil measured 30 cm. State 45p materials cost only. Labour, tools and overheads are unpriced. With a 60p budget, 15p remains; that is different from any selling margin. Fade the worked total and ask the group to complete a changed quantity.

Check and response: Ask how many 10 cm tape lengths make 30 cm. Three. Check the pupil uses 5p per length, not 5p per cm. Reteach the unit before adding.

We do 7 minutes

Say and do: Compare the model with an actual agreed allocation. Add an extra tape portion only if actually issued or clearly label a hypothetical comparison. Optional finishing paper is 5p only if allocated; it is not in the default total. Model a short own-word presentation using five timed prompts that total 120 seconds. Keep actual test findings, changes and help explicit. No public audience is required.

Check and response: Ask which cost changed and why. Then ask the pupil to link one presentation claim to a real record or clearly label a model estimate.

Hinge and own cost talk and review

Design and Technology LAUNCH Spring 2 Week 5 Thursday 25 March 2027 P1 Year A

We do 2 5 minutes

Say and do: Hinge answer: do not add again. The issued whole sheet includes both parts, the test card and offcuts. If anyone double counts, point to the one sheet and cross out the duplicate model line. Parallel check: an invented asking price is 90p and materials cost 45p. Is 45p the final net profit? No; it is above materials cost before unpriced labour, tools and overheads. Recheck with a fresh explanation.

Check and response: Move on when the pupil prices the allocation once and distinguishes materials cost from full business cost. Otherwise use Supported with the two model rows and a labelled estimate.

Independent 8 minutes

Say and do: Use one route. Pupils prepare briefly, then use the two-minute card within these eight minutes. For a small group, private adult presentations can run in a short rota while others cost and review; use an agreed paired or other accessible mode only with genuine observation and pupil consent. Do not force an audience or add time beyond the lesson. If everyone cannot be observed, record actual presentations only and keep remaining ones pending. Review the grid from real records; a tick is lesson evidence, not award completion.

Check and response: Check quantity, unit, price, total and estimate label; observe actual presentation mode/duration/support where it happens. For each grid status ask for a date, location and comment. Preserve pupil own words.

Review claims and future targets

Design and Technology LAUNCH Spring 2 Week 5 Thursday 25 March 2027 P1 Year A

Review 4 minutes

Say and do: Offer a private review. Correct any duplicate material charge or pence conversion. Confirm actual presentation record, duration, support and evidence location. If a cost or presentation is incomplete, retain that status. Review five weeks with six outcomes because Week 5 has two. Let the pupil correct scribed words. Tidy safe items inside the final minute.

Check and response: Pupil explains one cost or labelled estimate, one real progress claim and one next target. A printed presentation card alone does not prove presenting.

Exit 3 minutes

Say and do: Retain the pupil cost sheet, presentation record, progress reflection and closing grid. Mark missing evidence and actual support. No certification or whole-award completion is inferred. Use the final minute to confirm the pupil meaning and return safe items.

Check and response: The evidence records actual costing, presenting and review separately. An estimate, planned talk and completed presentation must not be confused.

Access and adult support

Design and Technology LAUNCH Spring 2 Week 5 Thursday 25 March 2027 P1 Year A

Cognition and Learning

Show one cost row at a time. Pair quantity and unit price, then add subtotals. Use the five presentation prompts one at a time. Model one evidence row, then fade to a question.

Communication and Interaction

Accept speech, signing, pointing to a prepared record or confirmed scribing. Offer a private adult audience and thinking time. Record the actual presentation mode and support, not an assumed performance.

SEMH

Use the invented client and classroom values. No personal finances or public comparison. Let the pupil choose private feedback and an agreed calm pause. Gaps lead to a next step, not public judgement.

Sensory and Physical

Provide a large cost table, read-aloud values and adult handling of an approved object. No tool use is required. Use a safe drawing or record when touching or showing an item is unsuitable.

Literacy and Numeracy

Keep pence beside each value. Multiply quantities by the price for that unit, then add. Model 45p equals£0.45. Provide short presentation sentence starts and read each scribed statement back.

EAL

Rehearse in any language. Pair quantity, price and total with the model row. Preserve the pupil meaning in own-word presentation or confirmed scribing. Do not mistake language support for missing understanding.

Materials free fallback

With no product, tools, paper, printer or device, hear the model prices. Use spoken sums and label your cost as an estimate. You may give a real private talk if an adult sees or hears it. Keep the actual mode, time and help. Use real work in your review, or name each gap. An adult can write your words and read them back. If no record can yet be made, the written record stays pending. Missing making, tests and actual product cost stay pending.

Where this leads

Product makers and designers explain what a design does, what materials were used and how evidence supports a change. Enterprise work compares an asking price with all relevant costs before judging a business result.
