Supported cost and review pack

Design and Technology LAUNCH Spring 2 Week 5 Thursday 25 March 2027 P1 Year A

I can explain a materials cost, present my work in my own words, and review my progress with real evidence.

1 Use the two model cost rows with an adult. Say whether they match your real allocation or are an estimate.

2 Multiply 1 sheet by 30p and 3 tape lengths by 5p, then add once.

3 Use five short spoken prompts for a private or accessible presentation. Record what really happened.

4 Review each outcome with a real record, support and one next target.

Keep your own record

In your book: actual allocation / estimate ___. Quantity unit price and total ___. Cost change or unknown value ___. Presentation actually shared / pending ___. Mode duration and support ___. Progress claim and real source ___. One future target ___.

Cost and evidence check

Default model: one sheet 30p plus three 10 cm tape portions at 5p gives 45p materials cost. Charge each allocation once. Do not turn a model into a claim about actual work. Use the six-outcome grid across five weeks.

Plan in any language. Point, speak, sign or confirm a scribe’s words. A private observed oral estimate can be a real presentation; practical gaps remain clear.
