Sequence and evidence guide

Design and Technology LAUNCH Spring 2 Week 5 Thursday 25 March 2027 P1 Year A

Design and Technology LAUNCH Spring 2 Week 5. Use the dated cover plan and real pupil records first. School and Public contain the same generic resources.

Close the five week unit

Week 1 designs for a problem. Week 2 selects materials and plans a card mock-up. Week 3 makes and improves. Week 4 evaluates strength and finish. Week 5 costs, presents and reviews progress, with two exact outcome rows. Only Week 5 is included here.

Evidence this week

Retain the pupil’s own material cost or labelled estimate, actual presentation record, progress judgement and five-week six-outcome grid. Include date, location, mode, duration, comment and support. A prepared presentation card does not prove a talk took place.

Actual cost scope

These are invented classroom resource values, not supplier prices or cash spending. Charge one issued whole sheet once, including offcuts, both stand parts and the test card. Three issued 10 cm tape lengths total 30 cm and include tape offcuts. The model materials total is 45p, which is £0.45. Actual work needs its real agreed allocation, not an automatic 45p.

Routes and private access

Use Supported, Standard or Stretch. Private oral or accessible explanation can be observed without a physical item. Type instead starts closed; Save my responses creates a local text file. No file, photo or private record is uploaded.

Honest estimates and the closing review

Design and Technology LAUNCH Spring 2 Week 5 Thursday 25 March 2027 P1 Year A

Retain the real work

Keep actual approved changes, pupil actions and adult support distinct. The earlier thin-card model uses a body 120 by 260 mm and U channel 100 by 30 mm. It supports one 80 by 60 mm card for a 30-second intended-use test. Do not recreate earlier making or testing from a model picture.

Cost once and label uncertainty

Charge the whole issued sheet once including offcuts and test card; retain recorded reuse. Charge each actual allocated tape portion once. Additional allocated trial material and waste are included once. Unknown quantities or missing product cost are labelled estimates. Materials cost excludes unpriced labour, tools and overheads.

The closing grid

Shown, More to do and Not yet seen are lesson evidence statuses. Add actual date, location, comment, support and a next gap. A tick does not certify completion of the unit award. Read the pupil’s own progress judgement back and agree one future target.

Materials free route

With no product, tools, paper, printer or device, hear the model prices. Use spoken sums and label your cost as an estimate. You may give a real private talk if an adult sees or hears it. Keep the actual mode, time and help. Use real work in your review, or name each gap. An adult can write your words and read them back. If no record can yet be made, the written record stays pending. Missing making, tests and actual product cost stay pending.

Where this leads

Product makers and designers explain what a design does, what materials were used and how evidence supports a change. Enterprise work compares an asking price with all relevant costs before judging a business result.
