Words for tectonic explanations

Tuesday 23 February 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 1 | HUM-LAUNCH-S2-W01

White paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

Keep this mat nearby. An adult can explain one word at a time. No reading aloud is required.

Word	Meaning
plate	A large piece of Earth’s stiff outer layer.
boundary	The place where two plates meet.
fault	A break in rock where movement can occur.
strain	A change in rock shape as forces act on it.
earthquake	Shaking caused by energy released as rocks slip.
divergent	Plates moving apart.
convergent	Plates moving towards one another.
subduction	One plate sinking beneath another.
transform	Plates sliding past one another.
mantle	The layer below the crust, mostly solid rock.
magma	Molten rock below Earth’s surface.
lava	Molten rock that reaches the surface.
hazard	An event or process that could cause harm.

Useful links: because; this causes; so; as a result; however. Plan in any language. The diagram arrows show motion, not the speed or size of real plates.
