Support for reading hazard records

Tuesday 2 March 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 2 | HUM-LAUNCH-S2-W02

Pink paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

Step 1 check the snapshot

Say the date: frozen on 30 October 2026. It is a printed learning pack. It does not update. Use A–C for recent comparisons.

Step 2 find the field

Use D3. Put your finger on one column heading. Read its label before its value. Depth uses km. Latitude and longitude use degrees.

Step 3 plot one point

Use D2 for A: 28 N and 140 E. N is above the equator. E is to the right of zero longitude. Plot B and C on D1. An adult can read each direction quietly.

Step 4 make a claim

Frame: Record ____ has the largest magnitude at ____. Record ____ is shallowest at ____ km. Record ____ is newest on ____. Point to the supporting value.

Partner roles

Analyst gives one claim. Evidence Checker checks the code, field and unit. Swap. Keep your own response.

Support and a private pause

Tuesday 2 March 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 2 | HUM-LAUNCH-S2-W02

Pink paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

A model to finish

Teacher-written model: C has a larger magnitude than A because C is 7.7 and A is ____. This does not prove that C caused the most damage because ____. Finish the gap, then cover the model.

A careful limit

The table does not give damage totals, numbers of people exposed or the protection in place. It cannot tell the exact time of the next earthquake. H is the separate Japan 2011 case.

PAUSE

Point to PAUSE or tell the adult privately. Use the agreed supervised place. You do not need to explain to the group. When ready, choose a private recap or the neutral direction task.

Neutral direction task

Place north, south, east and west around a blank square. No hazard event is needed. Stop when you wish. This is optional practice, not proof of the full outcome.

My next step

Choose one column label, one plot or one because link. Plan in any language. Use your usual aid. Keep actual help visible.
