Support for explaining weather risk

Tuesday 16 March 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 4 | HUM-LAUNCH-S2-W04

White paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

Step 1 name the hazard

Use C1. Heavy rain is a weather hazard. Flooding is a water hazard it can produce. Do not use the number of homes as the hazard.

Step 2 find exposure and vulnerability

Use A in C2. Exposure: 30 homes and a water pump. Vulnerability: older drains with limited capacity or low pump equipment. These are conditions, not a personal fault.

Step 3 use both axes

Use D3. A and B both have high likelihood. A has major potential severity and B minor. Frame: The chance category is the same, but the possible impact differs because ____.

Step 4 choose a measure

Use C4. Frame: ____ could reduce risk by ____. Its limit is ____. Say which condition or possible impact the measure changes.

Partner roles

Analyst explains one link. Evidence Checker points to its card and asks how. Swap. Keep your own response.

Support and a private pause

Tuesday 16 March 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 4 | HUM-LAUNCH-S2-W04

White paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

A model to finish

Teacher-written model: A and B share heavy rain and high flooding likelihood. A has greater potential severity because its exposed homes and low pump equipment ____. Finish the link, then cover the model.

A careful limit

High likelihood is not certainty. Major severity is a possible consequence, not proof it will occur. The three area records are invented planning assumptions. The guide is not a real forecast or warning.

PAUSE

Point to PAUSE or tell the adult privately. Use the agreed supervised place. You do not need to explain to the group. When ready, choose a private recap or the neutral block-sort task.

Neutral block sort

Order three stacks of plain blocks as low, medium and high. No weather or harm detail is needed. Stop when you wish. This is optional practice, not proof of the full outcome.

My next step

Choose one risk word, one comparison or one measure. Plan in any language. Use your usual aid. Keep actual help visible.
