# Words for extreme weather risk

Tuesday 16 March 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 4 | HUM-LAUNCH-S2-W04

White paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

Keep this mat nearby. An adult can explain one word at a time. No reading aloud is required.

| Word | Meaning |
|---|---|
| extreme weather | Weather that is unusually severe for its context. |
| hazard | A process or event that can cause harm. |
| exposure | Who or what is in the area affected by a hazard. |
| vulnerability | Conditions that can increase harm. |
| capacity | Strengths and resources that help people or systems cope. |
| risk | Possible harm, considering chance and consequences. |
| likelihood | How likely something is to occur. |
| severity | How serious impacts could be if an event occurs. |
| surface water | Rainwater on the ground that cannot drain or soak away. |
| catchment | An area from which water drains towards a river. |
| washland | Land that can store floodwater as part of a plan. |
| assumption | Something given or accepted for this planning exercise. |

Useful links: exposed are; this increases harm because; the same likelihood but; potential severity; reduces risk by; the limit is. Plan in any language. All area data and categories are invented.
