My hazard analysis and report

Tuesday 23 March 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 5 | HUM-LAUNCH-S2-W05

Pink paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

Learning outcomes

Analyse hazard data (spreadsheets); digital report.

Hazard case-study report (Mar).

Keep your own findings and case report. Work in your book first, use these spaces, or type offline in this editable file. An adult may scribe your exact words and read them back.

My data analysis W05 E1

Use recent records A–C from the frozen 30 October 2026 snapshot. H is the separate Japan case from 11 March 2011.

Newest recent record code and UTC date _____

Shallowest recent record code and depth in km _____

My computed gap and method _____

Choose C minus A for magnitude, or A minus B for depth in km. A magnitude gap is not an energy multiplier.

One limit of the data _____

My evidence statement _____

Magnitude and depth alone cannot rank damage or predict the next event.

Actual record to complete

My book or file reference _____ Actual work date _____

Actual authoring mode _____ Actual help used _____

Paper or scribed work does not by itself prove spreadsheet use, formula use or digital authoring.

My Japan case report

Tuesday 23 March 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 5 | HUM-LAUNCH-S2-W05

My own report W05 E2

Write about 100–150 words, or use linked notes or a private explanation with exact scribing and readback. You may plan in any language. Keep your own reasons.

Explain Japan on 11 March 2011. Link the plate cause to a primary effect and a secondary effect. Explain protection and preparation. Explain a warning or prediction limit. End with a reasoned judgement about what helps and why.

Include one checked finding from A–C. Keep these recent records separate from the historic case. These rows do not tell us which event caused the most damage.

Use the case cards and your analysis, then choose your own words. Do not copy a model report.

Optional help

Word bank: because, as a result, however, evidence, limit.

Sentence opener: My evidence is ____. This supports ____ because ____.

Keep Vocabulary_Mat and Support_Cards, including the small MAX model, beside this template. The model is not your own evidence.

This scaffold is not a completed model or your own response. Keep your own report in the blank space below.

Source card codes and own work reference _____

Actual authoring mode _____ Actual help used _____

Exact scribe and readback record if used _____
