Words for analysing and reporting hazards

Tuesday 23 March 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 5 | HUM-LAUNCH-S2-W05

White paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

Keep this mat nearby. An adult can explain one word at a time. No reading aloud is required.

Word	Meaning
analysis	Using data to find and explain patterns or comparisons.
magnitude	A measure of earthquake size, not a damage total.
depth	Distance below the surface, measured in km.
MAX	A spreadsheet function that returns the largest value in a range.
MIN	A spreadsheet function that returns the smallest value in a range.
method	How you reached a finding.
historic	From an earlier period in the past.
primary effect	A direct effect of ground movement or shaking.
secondary effect	An effect of a resulting event, such as tsunami flooding.
protection	Physical measures that can reduce some risks.
preparation	Plans, practice and supplies that help readiness.
judgement	A reasoned view supported by evidence.
limitation	Something the evidence or measure cannot establish or do.

Useful links: the value shows; I found the gap by; because; as a result; this helps by; however; my judgement is. Plan in any language. Keep actual mode and help visible.
