White standard edition

Enterprise: from garden to table.

A garden to table guide

These are possible linked stages, not jobs to complete today.

Chain link	What it means
Grow	Start a suitable crop with the resources and space it needs.
Care	Check plants and give only the care they need.
Adult checks	Check readiness, suitability and safety before harvest or food use.
Harvest if approved	Collect a crop only when ready and approved.
Prepare if approved	Food preparation needs suitable adult checks and safe conditions.
Offer or use at a table	A ready, suitable offer may be used or offered. No sale or eating happens today.

White standard edition

Invented offers within the chain

A labelled starter-plant pot with a care card could help at the growing stage. It is mainly a product.

Supervised plant-label and check help could support care. It is a service.

A produce basket would belong later, after adult readiness, suitability and food-use checks. This is a concept only.

Our own first ideas

My idea is ____ for ____ because ____.

The map can show loops back to care or checks. Not every offer must reach food use. Existing pea trays are for observation, not food stock.
