Tool safety and hygiene card

White standard edition

Plan a product/service to sell.

Prepare safe materials

Use adult-checked paper, pencils, labels and clean empty props. Keep the table and walking route clear. An observer or recorder role is available.

Make a planning mockup

Sketch or arrange a label and care-card mockup. Keep any real plants rooted and under adult care. No sharp tools, food handling, tasting or chemicals are needed.

Check before any offer

This is a plan to sell. An adult checks materials, availability, plant condition, safe claims and permission before any future offer. Do not contact customers, buy supplies, collect money or make promises today.

Finish calmly

Return props and pencils and clear the surface. Wash hands after handling gardening props. Park materials and tell the adult before a quiet pause.
