Enterprise choices and planning jobs

White standard edition

Plan a product/service to sell.

Make the plan useful

1 Confirm one offer, intended customer and useful need.
2 Sort the jobs into an order.
3 Match resources and role codes to the jobs.
4 Add checks before dependent jobs and any future offer.

Use the blank Plan Card in your book or ask an adult to scribe. A sketch or clean empty-pot mockup can help you explain the idea. Mark unknown resources to check.

A quality check

For the invented plant-pot model, a readable label and accurate care advice matter. The adult must confirm a suitable real plant and permission before any future offer. No selling occurs today.

Enterprise choices and planning jobs continued

White standard edition

Read back and agree

Does the plan have one offer and a particular customer need?
Are resources honestly confirmed or still to check?
Do jobs have an order, roles and checks?
Who covers a missing role?
What adult decision is still needed?

My one line

Our plan is to offer ____ to ____. The first job is ____.

Use your book or tell the adult what to scribe. Record planning and mockup work honestly. Return props, clear the table and wash hands after gardening props.
