Enterprise knowledge and model

Pink supported edition

Run a sale/market stall.

Before opening

The adult confirms permission, safe approved stock, clear prices and supervision. A float is starting change money that must be returned. It is not money earned.

A kind sale

Explain the offer and price clearly. Let the customer choose freely. Check the amount received and change with the adult. Record quantity, price and the sale value, without customer names.

Pink supported edition

A checked close

Count unsold and held stock. The adult counts cash twice. Separate float from sales receipts and check the record. Report a difference honestly. Record any refunds and other cash movements separately.

Invented model only

10 units cost £7 in total.
Price £1 each.
Opening float £5.
Eight sales bring £8.
