Stall safety and hygiene

White standard edition

Run a sale/market stall.

Permission and materials

An adult confirms permission, safe approved stock, truthful labels and the price before a real stall opens. Keep the route clear. Existing pea observation trays are not automatically sale stock or food.

Money and customers

The adult holds and checks money, supports change and manages refunds. Use kind language and accept no thank you. You may choose a stock, label, observer or recorder role.

Hygiene and close

No food handling, tasting, sharp blades or chemicals. Wash hands after gardening materials. The adult checks closing cash and stores money and stock safely.

Pause or fallback

Park materials and tell the adult before a quiet pause. An adult takes over. If adult checks are missing, use a clearly labelled rehearsal and record rehearsal evidence.
