Teacher and cover plan

Year A | Autumn 2 · Week 2 | 9 November 2026

Update scores from two game events

40 minutes. GROW. A pair, with one device each or a shared device and turn-taking. Formative lesson for the unit award; Week 7 is the assessing lesson.

Term theme

Identity & Belonging: clear, consistent scoring rules let every player see how their actions count.

Careers

Game testers check that each player action updates the right counter on screen.

Learning and evidence

I can update two score variables when the player touches a pickup or a hazard.

I added a rule that changes the pickup score by 1 on contact.

I added a rule that changes hazard hits by 1 on contact.

I used change blocks for events and kept set blocks for start.

I tested both events and the start reset with a partner.

I reopened my saved file and checked both event scripts.

Prepare before pupils arrive

Open the lesson page or editable slides. Check that pupils' Week 1 maze files or the clean Week 2 starter files are ready with two score variables set to zero on start. Print the two fictional project cards, chosen routes and individual evidence slips. Do not display real personal files.

Kit for two: up to two devices, display, two project cards, two route sheets, two evidence slips and pens. A paper fallback uses the same project cards and two-event planning frame. Keep the Week 1 files unchanged by saving into W02_Events.

Lesson sequence

Year A | Autumn 2 · Week 2 | 9 November 2026

Term theme: Identity & Belonging. Careers: game testers checking that player actions update the right counters.

Minutes	Stage	What to do
0-3	Arrival	Open the Week 1 maze file and verify the start reset to 0. Slides 1-2.
3-7	Starter	Compare set to 1 versus change by 1 on pickup contact. Slide 3.
7-10	Model	Add change pickup score by 1 inside the pickup contact check. Slide 4.
10-13	Model	Add change hazard hits by 1 and return to start on hazard contact. Slide 5.
13-15	Words	Teach event, touching, change and set. Slide 6.
15-20	Together	Match pickup and hazard contact events to their variable blocks. Slide 7.
20-23	Check	Test both events and check variable drop-down selections. Slide 8.
23-35	Task	Build and test two scoring events in individual maze files. Slides 9-13.
35-40	Exit	Demonstrate both events in the saved file; respond to feedback. Slide 14.

Protect the core task

Prioritise building the pickup score rule and the hazard hit rule using change blocks and verifying that each updates the right variable. Protect the saved-file check. The finish bonus event and v2 are optional stretch. Do not spend time fixing multiple counts on a single pickup today; reassure pupils that Week 3 solves that fault.

Modelling and support

Year A | Autumn 2 · Week 2 | 9 November 2026

Term theme and careers

Identity & Belonging. Game testers check that each player action updates the right counter on screen.

Model the two event rules

Open the Space maze project for card A. Show that start already sets FuelScore and HazardHits to 0. Build the pickup check: when the player touches the fuel pod, change FuelScore by 1. Emphasise choosing change rather than set.

Build the hazard check: when the player touches the laser wall, change HazardHits by 1 and move the player back to the start pad. Open the variable drop-down on the second block to show how easily FuelScore could be left selected by mistake, and switch it to HazardHits.

Two-event test

Run the maze, touch the fuel pod and verify that FuelScore rises by 1. Touch the laser wall and verify that HazardHits rises by 1 and the player returns to the start pad. Trigger start to confirm both counters return to 0.

Support and turn-taking

Offer one step at a time, processing time, quiet thinking or a short pause. Use the Supported planning frame without making choices for the pupil. With one device, switch builder and tester roles after six minutes. First pupil uses card A; second uses card B. Each has a distinct file. Record prompts, adult typing and scribing accurately.

Saving

Create W02_Events inside ICT_Practice in the agreed area. Save as Maze_Events_A_v1 or Maze_Events_B_v1 with the native project extension supplied by the software. Save, close, reopen through the folder and test both events. Retain v1 when saving an optional v2.

Checking learning and recording evidence

Year A | Autumn 2 · Week 2 | 9 November 2026

Term theme and careers

Identity & Belonging. Game testers check that each player action updates the right counter on screen.

Check	What must be observed
Pickup event	Touching the pickup item increments the pickup variable by 1.
Hazard event	Touching the hazard increments the hazard variable by 1.
Change vs set	Event scripts use change blocks while start uses set-to-zero blocks.
Event test	Partner test confirms both counters update and reset cleanly.
Player choice	Pupil explains why change by 1 is needed instead of set to 1.
Saved work	The saved project in W02_Events opens with both event rules intact.

Feedback and response

Give one specific success and one next-step prompt. Hear the pupil's response or read it back, then agree the next action. Record VF for verbal feedback, I for independent work, WS where support was used and NS+ for the next-step prompt. Use R only after a real response with an audience; written responses are in the same colour, on the same page or usual mode. Keep the actual support record.

Paper fallback

Choose card A or B and complete the pickup event rule, hazard event rule and change-versus-set explanation on the paper planning frame. This shows planning and explanation only. Mark digital event building and saving as not yet observed; complete those checks at the next available device session.

Privacy and progression

Use only the fictional project cards. Do not add real names, places or personal accounts. Do not publish pupil files. Week 3 stops a pickup counting more than once; Week 7 is the assessing lesson for the unit award. This week records formative progress.
