

Knowledge Organiser (BUILD W8): A festival of light

Humanities Aut 1 · 2026–27 · Workbook outcome: Explore a festival of light and why it matters.

Key Word	Definition
predict	The picture has three steps. First you predict, in writing, before you look. Then you check by turning the source card over. Then you say what changed.
check	The picture has three steps. First you predict, in writing, before you look. Then you check by turning the source card over. Then you say what changed.
say	The picture has three steps. First you predict, in writing, before you look. Then you check by turning the source card over. Then you say what changed.
Watch me do it:	Watch me do it: I look at the row of small lamps. I predict: they are for seeing in the dark. I write it down. Now I turn the card. The card says the lamps mark light winning over dark. I say what changed: I thought they were for seeing, and they are really for marking.

Key Facts

- In winter it gets dark early. In summer it stays light late.
- People use light to see. People also use light to show something.
- A candle on a cake is not there to help you see. It is there to mark a day.
- Lots of festivals in the world use light at the darkest time of year.
- A festival happens at the same time each year. That is part of what makes it one.
- You do not have to be part of a festival to learn what its lights are for.

Arrival Task

What we know about light

1) In winter it gets dark early. In summer it stays light late.

2) People use light to see. People also use light to show something.

3) A candle on a cake is not there to help you see. It is there to mark a day.

4) Lots of festivals in the world use light at the darkest time of year.

5) A festival happens at the same time each year. That is part of what makes it one.

6) You do not have to be part of a festival to learn what its lights are for.

A guess and a checked guess

Here are two answers about the same picture of small lamps. Answer A: “The lamps are there so people can see.” Answer B: “The lamps are there so people can see. I checked the card. It says they mark light winning over dark.”

Try it in your head: look at the lantern card. What do you think the lanterns are for? Hold that thought. Do not look at the card underneath yet.

We Do 1: Predict what the lights are for. Then check.

Card 1: lanterns on a string above a street. What are they for?

Card 2: a fire lit in a field at night. What is it for?

Card 3: a row of small oil lamps by a door. What are they for?

We Do 2: Predict the reason, then check the card

We predict one reason together first. Nobody turns the last card yet. Everyone writes a reason on a whiteboard, then we hold up the boards at the same time. The card for this one is the winter one. Your job is the reason. Why put lights up when it is already dark?

Scaffolding – Stretch

Word Bank

predict, check, say, Watch me do it:, Space, Voice, Audience, Influence

Your route

Two cards, plus one sentence saying why light matters at a dark time of year.

Sentence frames

"Who ... what they do ... so that ..." | "... because ..."

Reference Zone — keep this beside your work

The model

Watch me do it: I look at the row of small lamps. I predict: they are for seeing in the dark. I write it down. Now I turn the card. The card says the lamps mark light winning over dark. I say what changed: I thought they were for seeing, and they are really for marking.

Now watch one where nothing changes: the candles in the window. I predict they show that somebody is home and welcome. I turn the card. The card says the same. So I write: nothing changed, and now I know why.

Saying the reason together: the nights are long, so a light stands out, so people put lights up and come together. Three steps, one sentence.

Check yourself

- Check yourself: did you write your prediction before you turned the card?
- Check yourself: did you write what the card actually said, not what you hoped?
- Check yourself: did you say what changed, even if nothing did?
- Check yourself: is your reason about the dark and the people, not about the lamp?

From the lesson sheet

A festival of light

SoW: 'BUILD Weekly - Autumn'!C53 — "Explore a festival of light and why it matters."

Learning objective: I can predict what the lights at a festival are for, check my prediction against a source card, and say why light matters at a dark time of year.

No personal disclosure is required. Every task can be completed with the supplied picture and source cards.

Predict, check, say

Predict → check → say what changed. Write the prediction before you turn the card.

The first row is done for you, from the card we did together. It is in italics so you know it is not yours. Fill in as many rows below it as you can.

Independent Work – Stretch

Two cards, plus a reason why light matters when the nights are long.

Two cards, plus one sentence saying why light matters at a dark time of year.

Card	My prediction	What the card said	What changed
row of small lamps	for seeing in the dark	they mark light winning over dark	for marking, not for seeing

Choose a route

- 1. I chose my own route.
- 2. My predictions are in my own words.
- 3. Any adult help is written on the record.

5 · Learner confirmation

I confirm this is my own work.

Learner name (print)	Signature
Date	

Exit Ticket – Stretch

1) Read one prediction and check to a partner or an adult. The listener says back what changed, in their own words.

2) Did the listener miss what changed? Then change one word in yours. That change is your influence. It belongs to you, not to them.

3) Did the listener get it first time? Write that down too. A record that already works is worth noting.

Lundy Loop — this lesson

SPACE stays available. VOICE is received. AUDIENCE names back exactly. INFLUENCE changes one real next action.

Space	means you get room to join in.
Voice	means you get to say it.
Audience	means someone really listens.
Influence	means something changes because of what you said.
