Formula step cards

Tuesday 24 November 2026 | P6 | 40 minutes

Today I can

I can use cell references in formulas and check that totals update.

1 Check the data

Open Task. Check the input cells against the data card.

2 Build row formulas

In D4, multiply B4 by C4. Use * and start with =. Repeat for rows 5 and 6 using their own row numbers.

3 Add the total

In D7, add D4 through D6 with =SUM(D4:D6).

4 Test a change

Predict first. Change B4 from 3 to 5. Check D4 and D7. Keep this change.

5 Save and check

Save your own workbook. Close it and reopen it. Show a formula and its result.

Private responses

Point, write, type or speak quietly to an adult. No reading aloud is required.
