Support adult brief

Tuesday 24 November 2026 | P6 | 40 minutes

Before

Offer white or pink paper and a private response mode. Prepare a fresh workbook copy. Model is for demonstration; Task is for the learner.

Model

Point to the selected cell and formula bar. Draw attention to the initial =, the * and both cell references. Give processing time.

Together

Use the prompt ladder: point to the instruction; ask a short question; rephrase; offer a scaffold or choice; model the first step only, then return the task.

Independent

Prompt which row is being calculated without supplying the full answer. Use exact scribing if agreed. With one device change turns at six minutes; the other pupil plans in their book.

Record

Keep individual records. Observe references, the before and after totals, and reopening. Distinguish access support from reasoning prompts and adult corrections.

Close

Give the agreed next step privately and acknowledge the response. Mark unobserved digital skills not yet; do not infer them from paper calculations.
