The aim

I can use my ICT skills to make and check a clear kit update.

Files and privacy

Use a new folder and clear task labels. Keep original versions. Leave out personal details.

Sources and facts

Check who or what the source is for, when it was checked and whether it fits the task. A new date alone is not proof.

Formulas and charts

Use cell references to multiply inputs. Add row totals once. Chart the items with a useful title, labels and points. Start a bar or column chart at zero.

Clear communication

Use a title, heading and short paragraph. On a slide, use readable text and contrast. Describe a useful image and check its reading order.

Evidence and review

Keep file or book locations for seven weeks. Record dates, actions and help used. Missing work stays marked missing.

Where this leads

A short account of checked work can support an application. Use a saved example to explain a skill and the help you used.
