Use less, use again, sort waste

I am learning to... choose ways to care for a place.

Words

Word	It means	Example	My language
reduce	use less	I use the back. I need less paper.	
reuse	use a thing again	I fill a clean tub again.	
recycle	make new things from old stuff	An old can can be made into a new thing.	
material	what a thing is made of	This can is made of metal.	

A simple path

Three waste choices. Reuse only when safe; check local bins before recycling. Simplified; not to scale.

Show it

Point to the blank back of a sheet. Use a safe, clean thing again.

How I know

I can use less.

I can use a thing again.

I can say why I chose it.
