

Staff brief

SLT planning and evaluation

Lesson code: SCI-BUILD-A2-W07

SoW reference: BUILD scheme of work, Autumn 2 week 7

Exact SoW outcome: Review and evidence learning on skeletons, nutrition & rocks (Entry Level Science / UAS).

Evidence (scheme of work): Pearson Entry Level Science 8939 (E1→E3 intro); AQA UAS science units. F: working-scientifically observation & results tables. S: end-of-unit assessment + Entry Level / UAS evidence.

Evidence in this lesson: Pearson Entry Level Science 8939 (E1→E3 intro); AQA UAS science units. F: working-scientifically observation & results tables. S: end-of-unit assessment + Entry Level / UAS evidence.

Where it shows in books: Independent observation/result table or labelled explanation; review edits and exit response beside the original work.

Label evidence on the school's evidence app with this code: SCI-BUILD-A2-W07. For spoken, practical or photographic evidence, record the same code with the evidence.

Arrival (5 min): Pick a safe model or card to look at. Staff: Offer a safe kit choice and short first-then cue.

Starter (3 min): Think back. Say, sign or point. Staff: Ask three low-stakes prior questions; answers in note.

I Do (5 min): Watch one fact with one clue. Staff: Pre-teach words; show the full model; ask the show-me check.

We Do (7 min): Match a real model to a fact. Staff: Hand over the missing step; offer F or H route. Reset once.

We Do 2 (5 min): Choose one answer. All of us show it. Staff: Take all pupil responses at once; use decision rule and parallel hinge.

Independent (8 min): Show work you did about body, food or rock. Staff: Choose one adult for supported pupils, one for group; swap across the week.

Review (4 min): Hear one next step. Fix a part if you can. Staff: Give VF and one NS(+); invite one self-edit. Reset once.

Exit (3 min): Tell an adult what you know and how. Staff: Hear feedback and next step, choose next start, then one-minute reset.

Planned adaptation — cognition learning: Give a three-step visual card for show what we know about bodies and rocks; remove its last cue after a correct try.

Planned adaptation — communication interaction: Point to the real kit before a short spoken, signed or AAC response; wait for a turn.

Planned adaptation — semh: Offer a private first-then cue and planned pause before the hinge; re-enter with one step.

Planned adaptation — sensory physical: Use a stable tray, large cards or an accessible input; no forced touch.

Planned adaptation — eal: Rehearse a full M or H idea in any language before writing; keep the science challenge.

Planned adaptation — eef strategy: cognition learning: scaffolding; communication interaction: explicit instruction; semh: cognitive/metacognitive strategies; sensory physical: technology; eal: flexible grouping

Staff: confirm the planned adaptations actually used and record any changes below.

If behind — must teach core: Show work you did about body, food or rock. Preserve the individual evidence required above.

If behind — shorten or merge: After a secure hinge, shorten repeated oral rehearsal. If needed, merge the exit reflection into the Arrival of Spring 1 W01. Keep the core evidence and any safety teaching; record the change and coverage impact.

If behind — next lesson: Spring 1 W01: Describe how fossils are formed over a very long time (Mary Anning).

If behind — dependency: Pass on today's checked understanding and unresolved hinge errors for the next starter. Do not replace incomplete individual work with a group product.

Staff evaluation — date taught:

Staff evaluation — delivered as planned: ☐ Yes ☐ Partly ☐ No

Staff evaluation — criteria met: ☐ All ☐ Most ☐ Some

Staff evaluation — adaptations made and why:

Staff evaluation — change from sow reason and coverage impact:

Staff evaluation — evidence banked on the school's evidence app:

Individual target opportunities

Cognition & learning: We do: Use the real observation to state a fact about the rock. Record the pupil's own sequencing, attention or independence target, including the prompt level needed.

Communication & interaction: Check: respond to "A class claims a clean plastic lid floats. Which evidence could check the claim?" in the pupil's agreed mode. Evidence an individual communication/turn-taking target without requiring speech.

SEMH: Arrival: Pick a safe model or card to look at. Use the agreed predictable start or pause/re-entry plan; evidence the pupil's own regulation or engagement target privately.

Sensory/physical: Independent: Show work you did about body, food or rock. Offer the agreed accessible input, enlarged material or adapted equipment; record the pupil's target-related access/independence, not a diagnosis.

EAL: Model/shared rehearsal: use skeleton, nutrition, rock, evidence with the actual example; allow first-language planning and oral rehearsal before the independent response. Record the agreed language target; EAL is not SEN.

Capture E against the pupil's own IEDP target on the school's evidence app; the IEDP carries their EHCP-linked and Boxall targets, so one record serves every plan. Follow the pupil's IBSP where it differs from these routines.
