Researching the Solar System

I am learning to... check a source and share a fact about the Solar System.

Words

Word	It means	Example	My language
Solar System	the Sun and the objects that move around it	Earth is part of our Solar System.	
planet	a large, nearly round body that moves around a star	Earth is a planet that moves around the Sun.	
star	a hot body in space that makes its own light	The Sun is a star.	
source	where a fact or idea comes from	Card B is my source for Earth's orbit.	

Look at the model

Earth orbits the Sun. The Moon orbits Earth. Paths and sizes are simplified; not to scale.

How I know

I can find a fact on a class source card.

I can name the card that supports my fact.

I can fix a claim that the card does not support.

Say first: My fact is ____; card ____ supports it.

You can plan in any language.
