

GROW · Science · Autumn 2 · Week 4

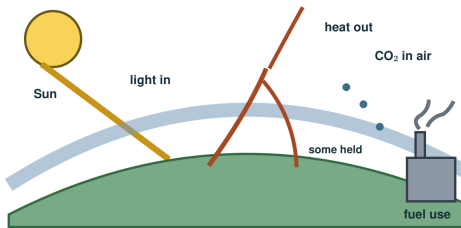

Global warming and choices

I am learning to... explain a cause and an effect of global warming, then compare two kinds of action.

Words

Word	It means	Example	My language
climate	the pattern of weather over many years	Climate is not the weather on one day.	
carbon dioxide	a gas added to the air when fossil fuels burn	Burning coal adds carbon dioxide to the air.	
greenhouse gas	a gas in the air that slows heat leaving Earth	Carbon dioxide is a greenhouse gas.	
impact	an effect on people or places	More heat can have an impact on people.	

Look at the model

Light comes in. Earth releases heat. More CO₂ slows heat loss. Simplified mechanism; not to scale.

How I know

I can put cause before effect.

I can say how gases add to warming.

I can compare a cut in emissions with help for an impact.

Say first: Burning ___ adds ___; this leads to ___ because ___.

You can plan in any language.
