

Global warming and choices

Today I can... ☐ I can put cause before effect. ☐ I can say how gases add to warming. ☐ I can compare a cut in emissions with help for an impact.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R _____

Arrival

Sort these: weather today; climate over many years. Point to the long-term idea.

My response

Starter

Think back. Say, point or write one answer for each question.

1. Name one fact about the Solar System and its class card.

2. Why does one place have night?

3. Name one way friction can affect motion.

Global warming and choices

Today I can... ☐ I can put cause before effect. ☐ I can say how gases add to warming. ☐ I can compare a cut in emissions with help for an impact.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R _____

Talk-then-sort

The burn fuel and impact cards are in place. Sort the missing gas and warming cards. Explain the link.

Burn fuel → add carbon dioxide → _____ → heat risks.

Choices: cause · middle link · impact · action

Card or step	My group or match
Burn fossil fuel	
More greenhouse gas	
Heat risk in some places	
Cut fuel use	

Build a cause-to-impact chain. Compare an emissions cut with help for an impact. Give one reason for each.

Independent F

Order one cause and effect.

First ____, then ____.

My response

Independent M

Explain two chain links.

Burning ____ adds ____; this leads to ____ because ____.

My response

Global warming and choices

Today I can... ☐ I can put cause before effect. ☐ I can say how gases add to warming. ☐ I can compare a cut in emissions with help for an impact.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R _____

Independent H

Compare an emissions cut with an adaptation.

Action A changes ____, while action B helps with ____; I would choose ____ because ____.

My response

Go deeper

Why might a council cut fuel use and plan flood defences? Name a limit of each.

My response

Choose a council goal, justify the first action and explain the problem still left.

My response

Exit

Name a cause, an effect and an action. Which link does your action change?

My exit response

? Read it back: explain a cause and an effect of global warming, then compare two kinds of action.

My feedback was... say what changed. Next I need to... name a fix.

Word help

Word	Meaning	Example	My language
climate	the pattern of weather over many years	Climate is not the weather on one day.	
carbon dioxide	a gas added to the air when fossil fuels burn	Burning coal adds carbon dioxide to the air.	
greenhouse gas	a gas in the air that slows heat leaving Earth	Carbon dioxide is a greenhouse gas.	
impact	an effect on people or places	More heat can have an impact on people.
