

Stem-cell decisions

Today I can... ☐ I can name a possible benefit and risk. ☐ I can ask for evidence that tests a claim. ☐ I can justify further research without claiming a cure.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R _____

Arrival

Look at this week's fictional stem-cell proposal card. Point to one detail you notice.

My response

Starter

Recall three ideas from earlier lessons. Show one answer at a time.

1. What is the name for a cell gaining a specialised job?

2. What two cells follow mitosis and cell splitting?

3. In which direction do particles spread by diffusion?

Stem-cell decisions

Today I can... ☐ I can name a possible benefit and risk. ☐ I can ask for evidence that tests a claim. ☐ I can justify further research without claiming a cure.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R _____

Talk-then-sort

Complete the missing step in the part-done model. Speak, then match the cards.

Possible benefit: may replace damaged cells. Possible risk: _____. Evidence needed: a fair check of benefit and harm.

Choices: evidence request · possible benefit · possible harm · unsupported assertion

Card or step	My group or match
The trial records how much damaged tissue changes.	
A treatment may help a damaged tissue.	
It must work because many people want it.	
A study could find a harmful effect.	

A fictional stem-cell proposal lacks safety results. Decide what to test next.

Independent F

Sort the fictional proposal statements under possible benefit, possible risk and evidence needed.

A possible benefit is ...; a possible risk is ...

My response

Independent M

Explain why a proposal needs evidence of both effect and harm before a decision.

The claim is not yet proven because we need evidence that ...

Stem-cell decisions

Today I can... ☐ I can name a possible benefit and risk. ☐ I can ask for evidence that tests a claim. ☐ I can justify further research without claiming a cure.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R _____

Independent H

Evaluate whether to support further research with a qualified reason, risk and evidence request.

I would support/review further research if ...; however, before treatment use I would need ...

My response

Go deeper

If a careful new study showed no improvement, how should the panel change its recommendation and why?

My response

Separate further research from routine treatment; explain the evidence needed for each.

My response

Exit

Show what you know with a model and explain one reason.

My exit response

My feedback was ... Name what you heard at Review.

Next I need to ... Add one precise piece of benefit or safety evidence you would request before deciding.

Word help

Word	Meaning	Example	My language
stem cell	a cell that can divide and form specialised cell types	Stem cells are being studied for possible medical uses.	
benefit	a possible helpful result	A possible benefit would be replacing damaged cells.	
risk	a possible harmful result or uncertain effect	A study must consider a risk to volunteers.	
evidence	information that tests or supports a claim	The trial needs evidence of both benefit and harm.
