Knowledge organiser

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Claim: A claim is an answer that we check with facts.

Evidence: Evidence can help us check if a claim is sound.

Audience: The audience receives your work and can ask a question.

1. Open with the question.
2. State your answer claim.
3. Give two or three facts. Show or say each source.
4. Show a diagram only if it helps.
5. Pause for an audience question.
6. Record what changed, or why it stayed. Choose one next use.

A short talk cannot use every fact. A neat slide does not prove a fact. You still need to check sources when someone asks a question.
