Lesson strips

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

I can present researched solar system findings clearly, credit sources and respond to an audience question with a change or a clear reason plus one transfer step.

Make a clear claim. Use facts and sources. Hear one question. Show your response. Choose one next step.

Use one strip in your book. You may point, say, sign or show your work to an adult.

Arrival Supported

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

In the research lesson, notes answered one clear question. Each note kept its meaning and had a source code.

Think back. Point to one model you used, or say what it showed.

What makes what we see a useful clue?

Look at the first picture. What do you notice?

Point to the question in your research notes.

Say one fact in your own words. You may point or sign.

Choose the shape word for the Sun, Earth and Moon.

Which opening is clear: one claim or every fact? Say why.

A clear opening

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Which start helps us follow a Solar System talk? Choose one. We will test it.

‘I found lots of things. Here is every note.’

‘Our question was __. The evidence shows __.’

Watch this animation first. I will name the topic later.

Choose first. Keep your idea. Check it with the model. You may point, say, sign or show your choice.

I · S · C □

The briefing chain

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Say your question. Then give one clear answer claim.

Choose two or three facts that fit your claim. Show each source label, or say it aloud.

Use a diagram, paper panel, slide or object if it helps people follow the science.

Our question was __. Our claim is __. Evidence from __ shows __.

Use a visual to help people follow the facts. A neat effect alone does not prove a claim.

I · S · C □

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

The science case

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Which panel makes the best science case? Choose one. Use the clues to say why.

A large title, five animations and no source labels.

One clear claim. Two facts that answer the question. A labelled diagram and source codes.

A copied paragraph, read fast. The question is not explained.

Choose one. Say what makes it strong. Hear the model, then try again if needed.

I · S · C □

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

A real audience question

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Ask for one question about meaning, facts or a limit. You need a real reply.

Say the question back in your own words. Point to the part it checks.

Show one change that helps. If the work is clear and sound, say why it stays. Then say where you will use it next, or how you will use less help.

Use: Our question was __. Our claim is __. Evidence from __ shows __. Your question made me change __ / confirmed __, so next I will __.

A short talk cannot use every fact. A neat slide does not prove a fact. You still need to check sources when someone asks a question.

Mission briefing studio

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Choose one card.

Place it with claim, evidence or audience response.

Check its job. Move it if needed.

Keep your chain. Practise it aloud, by sign or with a chosen adult.

Groups: Focused claim. Evidence and source. Audience response and next step.

Copy the card names and place each with its job in your book. Point, say, sign or direct an adult if this works best.

I · S · C □

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

Studio cards 1 to 4

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Opening line: Our question was why Mars looks red. Our claim is that iron minerals at the surface have reacted with oxygen.

Supporting fact: A useful fact is in your own words. The science organisation and source code are beside it.

Labelled diagram: A simple diagram points to the surface feature you talk about. It has a source label.

Received question: The speaker says the audience question back. This checks that they heard its meaning.

Choose each card. Match it to its job. Use the group names. Keep a full chain and practise it.

I · S · C □

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

Studio cards 5 to 7

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Visible revision: The audience asks about scale. The speaker adds not to scale to the Solar System diagram.

Confirmed, then transfer: The audience checks the source and meaning. Both are sound and clear. The speaker notes: No content change. Next I will explain it to a new audience with no sentence frame.

One-sentence answer: The speaker gives the main answer first. They add the facts after it.

Choose each card. Match it to its job. Use the group names. Keep a full chain and practise it.

I · S · C □

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

Check the claim

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

More animation always makes the science stronger.

Keep it. Movement proves that the facts are right.

Repair it. Use a visual if it makes the claim or facts clear. Check facts and sources.

Repair it. Hide source labels to make room for effects.

Choose one reply. Say why it fits the science. Use a source to check facts. You may change your mind after the check.

I · S · C □

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

Your briefing Supported

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Use three panels. Show one claim and two facts. Hear one choice question. Change one panel, or say it is checked and choose one next audience.

Point, use symbols, sign, speak or ask an adult to write your exact words. Practise with the sentence frame.

Use your research notes, a paper panel or school device, source labels and a way to keep the question and response.

Use school-approved content and devices. Keep personal details private. Use no flashing effects. Follow the agreed rules for sound and movement.

Use a paper poster, objects, speech, sign or audio with no personal details. An adult can write your exact words.

Keep the slide, paper panel or witness note. Keep source labels and one audience question. Show the change, or say why the work stays and name one next use.

Knowledge organiser

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Claim: A claim is an answer that we check with facts.

Evidence: Evidence can help us check if a claim is sound.

Audience: The audience receives your work and can ask a question.

1. Open with the question.
2. State your answer claim.
3. Give two or three facts. Show or say each source.
4. Show a diagram only if it helps.
5. Pause for an audience question.
6. Record what changed, or why it stayed. Choose one next use.

A short talk cannot use every fact. A neat slide does not prove a fact. You still need to check sources when someone asks a question.

I · S · C □

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

Word page

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Claim: an answer to check. A claim is an answer that we check with facts.

Evidence: facts we can check. Evidence can help us check if a claim is sound.

Audience: the people who hear or see. The audience receives your work and can ask a question.

Paraphrase: keep the meaning and use your own words.

Source label: a name or code that helps you find where a fact came from.

Transfer: use what you know with a new audience or with less help.

Choose one word. Use it to say how your talk helps the audience check the science.

I · S · C □

Briefing cue cards

Today I can

Make one clear claim. Use facts that fit it.

Show each source label, or say it aloud.

Hear one question. Show what you change, or say why it stays. Choose one next step.

Question: what did I want to find out?

Claim: what is my answer?

Fact 1: what supports it? Source: where can I check this?

Fact 2: what else supports it? Source: where can I check this?

Audience question: what did they ask?

Response: what changed, or why did it stay?

Next use: where will I use it, or what help will I use less?

Keep each cue short. Use it to speak, sign, point or direct your chosen adult.

Audience asks: How do you know the day is 10 hours?

Audience asks: Could you stand on Jupiter?
