

Industry and Nature: The Tees Story

I can combine industry and nature evidence to tell a balanced Tees story.

[Open the original interactive lesson](#)

Arrival · retrieve the previous move

Standard

Retrieve one industry and one nature clue.

Pupil-chosen arrival variant

Arrival rule: retrieve before adding new content. Personal or family disclosure is never required.

Starter · question before verdict

Enquiry

How can the Tees be both an industrial place and an important place for nature?

Retrieval question: Which sentence best fits Teesmouth?

- A. Official dated sources describe heavy industry and protected wildlife habitats close together
- B. It is only factories
- C. It is untouched wild land

I Do · model the disciplinary move

Model the decision and evidence, not just the answer.

STEP Industry evidence includes port, rail, ironworks and bridges.

STEP Dated nature evidence records intertidal mudflats, dunes and marsh, seals and migratory birds at Teesmouth.

STEP 'Nature is present' does not prove there was no damage or pressure.

I Do · model the disciplinary move

Industry · Nature · Both — sort the clues

- A. Teesport handles container ships
- B. Seals rest on Seal Sands at low tide
- C. The barrage controls the river level for boats and wildlife
- D. Chemical works at Wilton
- E. Wading birds feed on the mudflats
- F. Reclaimed industrial land is now a nature reserve
- G. industry

I Do · model the disciplinary move

H. nature

I. both

Choose a clue.

Industry: 0 · Nature: 0 · Both: 0

A. Build a balanced judgement

We Do · evidence hinge

Commit before reveal: Dated official sources record seals and birds. What is the safest conclusion?

- A. The habitat matters, but more evidence is needed about condition and pressures
- B. Industry caused no harm
- C. Nature and industry can never be near each other

I Do 2 · connect and qualify

Model connection, limitation and honest uncertainty.

STEP Use two lenses, not an industry-only or nature-only story.

STEP Industrial transport reshaped the estuary, while valuable habitats remain and recovery involved many actions.

STEP A balanced judgement names value, pressure and uncertainty.

ADAPTED OFFICIAL-SOURCE CARD

HUM-B-W14-C01 · Industry and protected wildlife share a landscape

I Do 2 · connect and qualify

Provenance source: HUM-B-W14-S02

Natural England's 2019 announcement describes industrial facilities sharing the Tees Estuary landscape with coastal habitats. The expanded SSSI protects mudflat, saltmarsh, dunes, lagoons, birds and harbour seals.

Can establish Establish the 2019 designation rationale and protected habitat/species evidence.

Cannot establish Prove that all environmental problems are solved or provide current population counts.

I Do 2 · connect and qualify

Accessible route Two-column card: INDUSTRY — facilities and port landscape; NATURE — mudflat, marsh, dunes, birds and harbour seals.

HUM-B-W14-C02 · A dated Teesmouth habitat description

Provenance source: HUM-B-W14-S03

Natural England's dated reserve guidance describes sand dunes, grazing marsh and intertidal mudflats, with harbour seals and migratory waterbirds, against a backdrop of heavy industry.

Can establish Establish what the official dated description recorded.

I Do 2 · connect and qualify

Cannot establish Guarantee a present-day sighting or establish current habitat condition.

Accessible route Numbered clues: 1 dunes; 2 marsh; 3 mudflats; 4 seals; 5 migratory birds; 6 heavy-industry backdrop.

ADAPTED OPERATOR-ACCOUNT CARD

HUM-B-W14-C03 · Recovery involved more than one action

Provenance source: HUM-B-W14-S01

I Do 2 · connect and qualify

The Canal & River Trust says conservation efforts began before the Tees Barrage opened in 1995 and the river had already begun to recover. Natural England also credits water-quality investment, habitat creation/management and conservation partnerships. The barrage is not presented as the sole cause.

Can establish Support a cautious multi-action recovery account.

Cannot establish Measure ecological change independently or assign recovery to one intervention.

Accessible route Three-stage strip: damage and sewage/industrial pressure → several recovery actions and partnerships → continuing protection and care.

We Do 2 · interactive humanities lab

Interactive probe: response → evidence or representation → adult receives → next question or scaffold changes.

Two-Layer Tees Story

CONSTRUCTED TEACHING SOURCE — created for classroom practice. It is not an archival original.

Disciplinary focus: Thematic classification and chronological synthesis

Build both layers. Removing either displays: 'INCOMPLETE STORY.' Nature cards are modern dated evidence, not claimed start dates or live population counts.

We Do 2 · interactive humanities lab

Pull / pressure Balanced evidence Push / opportunity

INDUSTRY

- 1825 rail
- 1850 ironstone
- 1911 Transporter
- 1931–34 Newport

NATURE

- mudflat

We Do 2 · interactive humanities lab

- dune and marsh
- harbour seals
- migratory birds

INTERACTION

- heavy-industry backdrop beside Teesmouth habitats
- water-quality investment, habitat creation and management, and conservation partnerships contributed to recovery

We Do 2 · interactive humanities lab

Evidence classification

- A. INDUSTRY 1825 rail
- B. INDUSTRY 1850 ironstone
- C. INDUSTRY 1911 Transporter
- D. INDUSTRY 1931–34 Newport
- E. NATURE mudflat
- F. NATURE dune and marsh
- G. NATURE harbour seals

We Do 2 · interactive humanities lab

H. NATURE migratory birds

I. INTERACTION industry beside habitat

J. INTERACTION many recovery actions

Accessible route: Three habitat icons with text labels and an industry–nature–people sorting card. No wildlife sighting is promised.

Independent · build defensible evidence

Independent humanities mission

Balanced synthesis using at least two industry and two nature clues, plus a pressure, limitation or uncertainty at the selected access route.

16 minutes. Supported, Standard and Stretch are movable routes, not pupil labels.

HUMANITIES STUDIO READY

Source / materials Teacher-prepared constructed lab cards plus the locally approved source cards named for this lesson.

Independent · build defensible evidence

Care / access Use the stated text, visual, pointing, sorting, speaking or exactly scribed route. No personal or family disclosure is required.

Evidence target Balanced synthesis using at least two industry and two nature clues, plus a pressure, limitation or uncertainty at the selected access route.

Supported

Build a two-industry plus two-nature board.

Evidence: Four-card balanced board.

Independent · build defensible evidence

The Tees has ____ and ____.

Fade the first prompt no longer needed.

Standard

Use six clues and one 'but'.

Evidence: Claim–evidence chain.

Industry changed ____ because _____. Nature matters because _____. But _____.

Stretch

Answer the enquiry with four or more clues, a pressure and a limit.

Independent · build defensible evidence

Evidence: Reasoned verdict.

Overall _____. Evidence _____. However _____. We still need _____.

Exit · receive, interpret, influence

Standard

Explain how both can be true.

VOICE: The pupil gives a balanced Tees verdict through the selected exit route and chooses exactly one next enquiry: environmental change or future work beside the Tees.

One BUILD Humanities close only; no signature, receipt, upload queue, tally, vote or second closure form.
