

Settlement & Urbanisation • Why Here?

LAUNCH • Humanities • 40 minutes

I can explain settlement growth through a connected causal chain, weigh a counter-factor and reach a qualified judgement.

Name: _____ Date: _____

You may write, type, say, sign, point or direct a partner. An adult can read the words and record your exact response. Keep the choice and explanation your own.

We do • make a choice and give a reason

Commit before reveal: Which evidence most directly demonstrates urbanisation?

- One town's population rises.
- New homes are built beside a road.
- The fictional region's urban population share rises from 54% to 67%.

My choice and the evidence I used:

Resources and independent record

LAUNCH Humanities · Week 10 of 14 40 minutes · Aut2·W3 · Explain settlement & urbanisation

Enquiry: Why do settlements grow, and who experiences the effects differently?

Learning objective: I can explain settlement growth through a connected causal chain, weigh a counter-factor and reach a qualified judgement.

Vocabulary: settlement · urbanisation · land use · accessibility · driver · stakeholder · brownfield · sustainability

CONSTRUCTED CLASSROOM RESOURCE: This fictional composite is inspired by the broad Teesside setting. It is not official data, is not to scale and must not be used for navigation, safety or real-world planning.

Week 10 evidence pack · Teesbridge Change Series

Year	Population	Built land	Urban share of fictional region	Manufacturing jobs
1950	18,000	6 km ²	54%	46%
1980	31,000	11 km ²	67%	38%
2000	39,000	16 km ²	73%	20%
2025	47,000	21 km ²	79%	12%

Table continued · same row labels

Year	Service jobs
1950	22%
1980	35%
2000	52%
2025	68%

Causal-chain cards

A new crossing reduces journey time.

Firms value access to labour and markets.

Jobs and services attract some households.

Housing and built land expand near accessible sites.

Some residents gain access; others face cost or displacement pressure.

Open-land and travel impacts create a planning trade-off.

Planning choices: brownfield homes · edge expansion · bus investment · riverside green space. There is no perfect score: identify who gains, who bears a cost and what evidence is missing.

Evidence boundary: Teacher-approved/licensed sources retain title, author/producer, date, origin, scale and rights/use. No personal/family location or migration disclosure is required.

Independent evidence • Week 10

Supported

Arrange the causal cards, add one time-series figure and explain one chain with because → therefore → however.

Available support: Supported access: causal-chain tiles and stakeholder icons; learner supplies the link.

Standard

Use two quantified changes in a connected causal chain, then weigh a counter-factor or stakeholder trade-off.

Available support: Standard scaffold: driver → process → evidence → impact → however.

Stretch

Make a planning decision using two time-series figures, defend it from two stakeholder viewpoints and weigh a counter-policy.

Available support: Stretch scaffold: ranked factor → counter-factor/counterfactual → qualified verdict.

Response

Evidence → judgement → limitation

My decision / product:

Evidence I used:

Counter-evidence, anomaly or limitation:

Response route: written/typed verbal/recorded annotated/map scribed exact words

Exit: Complete: Urbanisation is more than population growth because... Then state the strongest evidence limit.

Paper route • discuss the lesson choices

Use these choices with the matching teaching stage. Point to or number a choice, explain it, then revisit it after feedback. The original HTML keeps the live controls.

- Ironworks open; workers arrive from Wales, Ireland, Scotland and the countryside
- 1830: the railway is extended to a new coal port on the Tees
- 1901: population passes 90,000
- 1850: ironstone is found in the Eston Hills, close to the port
- Stockton had the river first — so the river alone cannot explain it
- The coal port was slow at first — so the railway alone cannot explain it
- The town needed people to choose to move — so growth also depended on migrants
- Judgement: the railway caused the town
- Judgement: ironstone was decisive, but only because the railway and port already existed
- Brownfield homes
- ↗ Edge expansion
- Bus investment
- Riverside green
- ↶ Reset

Choice / card	My reason or evidence	My revision after feedback

Visual evidence from the lesson

Bar chart of Middlesbrough population growth 1801 to 1901

Causal chain: railway then ironstone

Full causal chain to 1901

“The railway caused Middlesbrough.”

Too strong. The railway made a port possible;
ironstone, capital and migrant workers turned a port into a town.

a qualified judgement names the strongest factor AND its limit

A qualified judgement

Exit • one next step

After the adult has listened, what will you keep, improve or check next?
