

Contrasting Places • Same Measure, Different Meaning

LAUNCH • Humanities • 40 minutes

I can compare two places using matched evidence and scale, explain similarities and differences, and qualify the comparison.

Prepare before pupils arrive

Print the pupil pack and open Lesson.pptx. Keep the uploaded HTML available for its live controls. Prepare any approved atlas/source extracts, existing learner work, authorised local data or prior planner named in the source lesson.

Check the approved source/data pack, access route and lesson boundary before pupils arrive.

Stable Space first. Replace inaccessible format before reducing geographical demand.

Access and participation

Offer reading aloud, pointing, signing, quiet thinking, a no-touch route and exact scribing where these support the learner. Keep the same subject decision. In shared work, let each learner commit before feedback; use a partner as card mover or checker, then swap. Avoid public speed rankings.

40-minute teaching sequence

Stage / total time	Teaching move	Adult support / response
Arrival • 3 min	Standard State a W12 pattern, then name the year/method needed for a fair comparison.	Give quiet retrieval time and the smallest useful cue. Secure → step back. Access block → change format, not the geographical demand.
Starter • 3 min	Enquiry How far are two contrasting places different—and what evidence might challenge that claim? QUESTION / HYPOTHESIS “How do two places compare, and why?” MAP / DATA / METHOD Matched evidence: the same measures at the same scale.	Elicit a provisional geographical judgement before explanation. Do not use a public vote to validate reasoning.
I do • 4 min	Model one reasoning step at a time. Match indicator, unit, date, method and spatial scale before comparing values.	Model one evidence-to-judgement step at a time. Ask the learner to name the evidence used in each step.

Stage / total time	Teaching move	Adult support / response
We do · 3 min	Commit before reveal: Which is the strongest geographical comparison?	Require a reason before giving feedback. Secure → transfer or counter-evidence. Not yet → return to the key evidence and retry.
I do 2 · 3 min	Strengthen—not lengthen—the reasoning. Use Both... whereas... because... however... to sustain comparison rather than write two separate descriptions.	Raise challenge with counter-evidence, scale, alternative method or validity. No volume-only stretch; keep access supports available.
We do 2 · 4 min	Matched Place Lens CONSTRUCTED CLASSROOM RESOURCE: This fictional composite is inspired by the broad Teesside setting. It is not official data, is not to scale and must not be used for navigation, safety or real-world planning.	The learner makes the geographical choice; the interface is rehearsal only. Use the response to adjust the independent question or scaffold.
Independent · 16 min	Independent mission I can compare two places using matched evidence and scale, explain similarities and differences, and qualify the comparison. 16 minutes.	Protect learner ownership; fade content prompts while access remains. Feedback should produce a substantive edit or re-attempt.
Exit · 4 min	VOICE: State the strongest matched contrast, one similarity and one missing indicator that could change the judgement.	Receive the actual response; record product, route and highest content prompt. Change the next source, question, scaffold or method and explain what changed.

The timing belongs to the whole stage. Several PowerPoint slides may share it; do not restart that time on every slide. Full source-stage text is in the PowerPoint speaker notes and original HTML.

Answers, evidence and feedback

We do checkpoint

Riverside East has 48 scheduled departures compared with Dalehaven's 8, using the same constructed 2025 measure.

Record the teaching response

What the learner actually showed	Next teaching action
Secure explanation with evidence	Reduce content prompting; offer another example or a limitation.
Partly correct / mixed	Point to the deciding evidence and invite a revision.
Access barrier	Change the reading, sensory or response format; keep the subject decision.
Missing source or observation	Keep the gap visible. Name the source or authorised check needed.

Safety and evidence boundary

Use the centre's authorised practical or fieldwork method and local risk assessment. Supplied sample data, fictional place models, card feedback and rehearsals are teaching material. They are not the learner's practical observations or proof of a qualification outcome. For portfolio use, check the exact registered unit/version, accepted evidence and centre process.

Sources and companion notes

Primary classroom source: LAUNCH_HUM_W13_Contrasting_Places.html

The uploaded lesson is included unchanged. Text and teaching steps in the PowerPoint are editable; source diagrams are placed images. Word booklets are editable. Static PDFs cannot reproduce HTML controls; use the paper cards/tables or open the original HTML.

Verification scope: matched to the uploaded title, pathway, objective, stage sequence and 40-minute timing. Embedded workbook references are retained as source locators; this is not a new line-by-line audit of every scheme-of-work row or a centre assessment sign-off.
