

# Fieldwork Enquiry Verdict

**I can independently construct and evaluate a fieldwork enquiry using question, method, data, analysis, conclusion and limitations.**

[Open the original interactive lesson](#)

# Arrival · retrieve and reconnect

## Standard

Retrieve the method, one result and one limitation without adding new evidence.

## Starter · enquiry / tension

### Enquiry

What does our evidence support about place—and what stops us claiming more?

QUESTION / HYPOTHESIS

Question → method → data.

MAP / DATA / METHOD

Analysis → conclusion → limitations.

PATTERN + ANOMALY

JUDGEMENT + LIMIT

## Starter · enquiry / tension

Independent enquiry: agreed access only, no answer coaching.

# Starter · enquiry / tension

**QUESTION**

testable · one variable

**METHOD**

sampling · controls · ethics

**DATA**

table · checked · units

**ANALYSIS**

graph · pattern · anomaly

**CONCLUSION**

answers the question

**LIMITATIONS**

sample · time · scorer

**Every link must point back to the question.**

a conclusion that answers a different question is a broken chain

Chain part 1

Chain part 2

Chain rule

## Starter · enquiry / tension

**Evaluate: what would you change, and what would that fix?**

an improvement names the weakness it repairs

Evaluate

# I Do · model geographical reasoning

Model one reasoning step at a time.

Rehearse process only: Question → Method → Results → Analysis → Conclusion → Evaluation.

Select evidence that answers the enquiry; quantity does not replace relevance.

Keep association separate from causation and reliability separate from validity.

## We Do · hinge judgement

Commit before reveal: A separate practice enquiry measured noise at only two sites, once. Which evaluation is strongest?

- A. The method is valid because both sites used the same score.
- B. It offers a snapshot, but few sites and one time weaken reliability and any wider claim.
- C. The result proves the same pattern exists across the whole region.

## I Do 2 · counter / qualification

Strengthen—not lengthen—the reasoning.

Freeze the approved evidence pack and the pre-agreed access route before independent work begins.

During the protected outcome, adults may read, enlarge, chunk or transcribe exact words—not select evidence or improve the judgement.

Marking, teaching feedback and intervention changes happen only after completion under centre rules.

## We Do 2 · interactive reasoning lab

### **Evidence Chain · rehearsal only**

CONSTRUCTED CLASSROOM RESOURCE: This fictional composite is inspired by the broad Teesside setting. It is not official data, is not to scale and must not be used for navigation, safety or real-world planning.

REHEARSAL ONLY · This panel closes before the protected independent outcome. It does not create or improve assessed evidence.

## We Do 2 · interactive reasoning lab

- A. 1 · Question What exactly is being tested?
  - B. 2 · Method Could another geographer repeat it?
  - C. 3 · Results Which graph/data answer the question?
  - D. 4 · Analysis Pattern, figures and anomaly?
  - E. 5 · Conclusion How strongly is the claim supported?
  - F. 6 · Evaluation Reliability, validity and improvement?
- Audit the structure. Do not draft the learner's answer in this panel.

# Independent · protected enquiry

## Independent mission

I can independently construct and evaluate a fieldwork enquiry using question, method, data, analysis, conclusion and limitations.

20 minutes. Approved access can change format, reading load or response mode; it cannot supply the geographical judgement.

**PROTECTED OUTCOME** · Select and agree the access route before starting. During the 20 minutes, support protects access but cannot supply evidence, reasoning or wording.

Supported · privately agreed

## Independent · protected enquiry

Use only the pre-agreed access route: approved section headings, reading support or exact-word transcription; the judgement stays learner-owned.

Supported access contract: headings/format/reader/scribe agreed before start; no sentence completion or evidence selection.

Standard · privately agreed

Produce the protected enquiry response using the frozen evidence pack and the approved response mode.

Standard access contract: independent written, typed or recorded response using frozen materials.

# Independent · protected enquiry

Stretch · privately agreed

Sustain a qualified judgement with counter-evidence, reliability/validity distinction and a justified next method.

Extended demand: synthesis across data, method and comparison; access remains but content prompting does not.

## Exit · evidence → response → Influence

VOICE: After collection only: record the response route and whether any content prompt occurred. If it did, mark the outcome unprotected and follow centre rules for a fresh opportunity.
