

Autumn Science Evidence

BUILD • Science • 40 minutes

Select genuine class records about skeletons, nutrition and rocks, organise them by topic, and add a cautious explanation and evidence limit to each.

Prepare before pupils arrive

Print the pupil pack and open Lesson.pptx. Keep the uploaded HTML available for its live controls. Prepare any approved atlas/source extracts, existing learner work, authorised local data or prior planner named in the source lesson.

Wait, receive and use the least prompt needed.

Keep adult action separate from pupil authorship.

Staff card: preserve the learning goal; change modality before changing demand.

Modal guidance carrier.

An honest autumn science evidence set · entry map: A nutrition comparison keeps the same label basis visible. Link that anchor only when this second detail is relevant: A rock record distinguishes appearance from a controlled property test. For this an honest Autumn science evidence set decision, use a quiet card sort, a spoken response, a communication aid or adult handling directed by the learner; the learner still chooses the evidence, order, comparison or action. Staff supporting an honest Autumn science evidence set may steady the named materials and read the displayed source exactly. They do not upgrade the an honest Autumn science evidence set response, fill its missing result or convert its plan into completion. If access to an honest Autumn science evidence set stalls, pause, lower visual density or move to the printed route while keeping the same reasoning demand.

For review or assessment lessons, prepare the centre-approved questions, outcomes and existing learner records. Practice cards and a completed worksheet do not supply missing assessment evidence.

Access and participation

Offer reading aloud, pointing, signing, quiet thinking, a no-touch route and exact scribing where these support the learner. Keep the same subject decision. In shared work, let each learner commit before feedback; use a partner as card mover or checker, then swap. Avoid public speed rankings.

Uploaded outcome: Review and evidence learning on skeletons, nutrition & rocks (Entry Level Science / UAS).

Uploaded workbook locator: 'BUILD Weekly - Autumn'!C45

40-minute teaching sequence

Stage / total time	Teaching move	Adult support / response
Arrival · 3 min	A skeleton record needs a named structure and a supported function. A nutrition comparison keeps the same label basis visible.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.

Stage / total time	Teaching move	Adult support / response
Starter · 3 min	Picture first: the same map. Today: pick the records that best show each topic, and be honest about what each one proves.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
I do · 4 min	What does each record actually support? Choose a record, then the strongest honest claim about it.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
We do · 3 min	A rock record distinguishes appearance from a controlled property test. Existing evidence is used honestly; a missing practical is not restaged for a photograph.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
I do 2 · 3 min	Available evidence A skeleton record needs a named structure and a supported function. Reasoning move A nutrition comparison keeps the same label basis visible.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
We do 2 · 4 min	Supported Match six supplied records to topic headings and complete one caption frame and limit frame per topic. Standard Select and justify two records per topic, then write cautious captions and a method-specific limit.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
Independent · 16 min	Assemble a three-topic evidence page from genuine records already available. Include two records per topic where available, a source or method locator, one bounded caption and one limit.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.
Exit · 4 min	Present one selected record, its caption and its limit. The adult repeats the evidence claim exactly.	Wait, receive and use the least prompt needed. Keep adult action separate from pupil authorship.

The timing belongs to the whole stage. Several PowerPoint slides may share it; do not restart that time on every slide. Full source-stage text is in the PowerPoint speaker notes and original HTML.

Answers, evidence and feedback

This is an open evidence task. Judge accuracy against the supplied source or approved mark points, the evidence chosen, the explanation and the stated limit. A personal preference or self-rating has no single correct answer.

Record the teaching response

What the learner actually showed	Next teaching action
Secure explanation with evidence	Reduce content prompting; offer another example or a limitation.
Partly correct / mixed	Point to the deciding evidence and invite a revision.
Access barrier	Change the reading, sensory or response format; keep the subject decision.
Missing source or observation	Keep the gap visible. Name the source or authorised check needed.

Safety and evidence boundary

Use the centre's authorised practical or fieldwork method and local risk assessment. Supplied sample data, fictional place models, card feedback and rehearsals are teaching material. They are not the learner's practical observations or proof of a qualification outcome. For portfolio use, check the exact registered unit/version, accepted evidence and centre process.

Sources and companion notes

Primary classroom source: SCI_B_W14B_Autumn_Science_Evidence_Do.html

The uploaded lesson is included unchanged. Text and teaching steps in the PowerPoint are editable; source diagrams are placed images. Word booklets are editable. Static PDFs cannot reproduce HTML controls; use the paper cards/tables or open the original HTML.

Verification scope: matched to the uploaded title, pathway, objective, stage sequence and 40-minute timing. Embedded workbook references are retained as source locators; this is not a new line-by-line audit of every scheme-of-work row or a centre assessment sign-off.
