

Topics 2 and 3 assessment review map

LAUNCH • Science • 40 minutes

Organise the Topic 2 and 3 knowledge to be reviewed and plan how to show it in the supplied assessment.

Name: _____ Date: _____

You may write, type, say, sign, point or direct a partner. An adult can read the words and record your exact response. Keep the choice and explanation your own.

We do • make a choice and give a reason

An approved response route can be written, selected, spoken, signed, pointed to or exactly scribed. A missing or uncertain item stays visible for the next authorised check instead of being guessed.

My choice and the evidence I used:

Resources and independent record

LAUNCH Science • Week 15L1 • Topics 2 and 3 assessment review map

Objective: Organise the Topic 2 and 3 knowledge to be reviewed and plan how to show it in the supplied assessment.

A topic 2 and 3 assessment review map working record

Use each row to show the supplied evidence or genuine action, the response about a Topic 2 and 3 assessment review map, and one explanation, boundary or authorised next check.

Focus	Record or action	Explanation, response or limit
Supplied evidence		
Reasoning or action		
Boundary and next check		

LAUNCH Science • route, audit and learner confirmation

Choose a route

Supported

Match approved question cards to headings, choose a response mode and complete one retrieval frame per heading.

Standard

Organise the full supplied review set, retrieve without the model first and justify the order in which sections will be attempted.

Stretch

Diagnose two likely confusions from the supplied set, design a discriminating retrieval check and explain why it separates the ideas.

Evidence audit

- Source, material or action locator visible:
- Reasoning can be checked:
- Safety and missing status honest:
- Learner's next action received exactly:

Paper route • discuss the lesson choices

Use these choices with the matching teaching stage. Point to or number a choice, explain it, then revisit it after feedback. The original HTML keeps the live controls.

- the order of mitosis stages
- percentage change = $(\text{final} - \text{initial}) \div \text{initial} \times 100$
- why observed ratios differ from 3:1
- A pairs with T, C pairs with G
- embryonic vs adult stem cell range
- whether a stem-cell lab result would work in patients
- secure — I can retrieve it now
- needs retrieval practice
- an authorised check is needed

Choice / card	My reason or evidence	My revision after feedback

Visual evidence from the lesson

Topics 2 and 3 review map

Exit • one next step

After the adult has listened, what will you keep, improve or check next?
