

Topics 2 and 3 evidence task lab

Work through supplied Topic 2 and 3 questions, recording each response and any uncertainty before choosing a final response.

[Open the original interactive lesson](#)

Retrieve without guessing

The approved task wording and source locator remain visible while evidence is interpreted.

An observation is recorded before an inference so the two cannot be blurred.

A response choice is justified by a named feature, pattern or calculation from the supplied task.

Uncertainty is not failure: it identifies the exact concept, word or step to retrieve before the assessment response is final.

Retrieve without guessing

Arrival decision: The approved task wording and source locator remain visible while evidence is interpreted. Uncertainty is not failure: it identifies the exact concept, word or step to retrieve before the assessment response is final.

Which response is supported by the supplied evidence, and which uncertainty must remain visible before a final choice?

Picture first: the same map. Today: which responses the evidence supports, and which uncertainties you must keep visible.

Which response is supported by the supplied evidence, and which uncertainty must remain visible before a final choice? An observation is recorded before an inference so the two cannot be blurred.

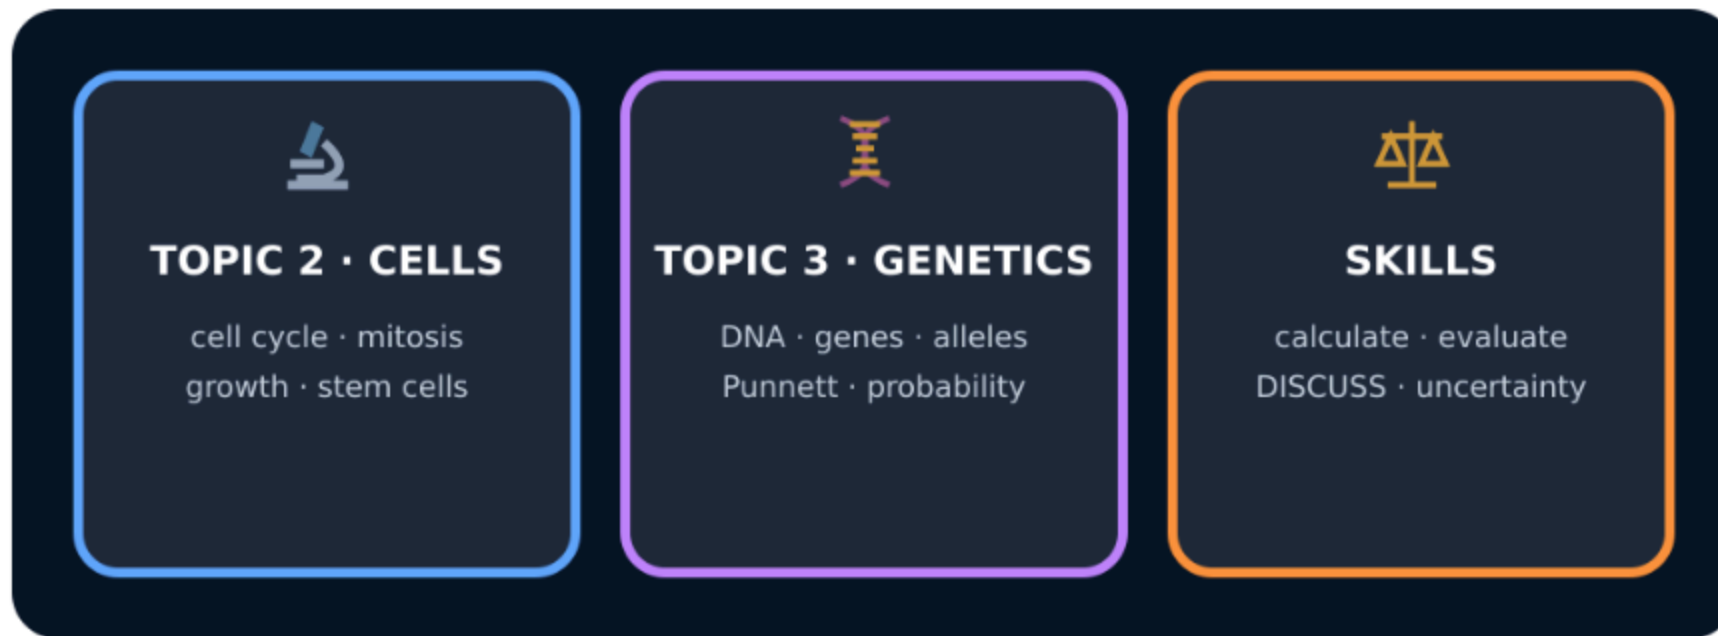

Checking questions:

- The approved task wording and source locator remain visible while evidence is interpreted.
- An observation is recorded before an inference so the two cannot be blurred.

Which response is supported by the supplied evidence, and which uncertainty must remain visible before a final choice?

- A response choice is justified by a named feature, pattern or calculation from the supplied task.
- Uncertainty is not failure: it identifies the exact concept, word or step to retrieve before the assessment response is final.

Which response is supported by the supplied evidence, and which uncertainty must remain visible before a final choice?

Topics 2 and 3 review map

Approved topic 2 and 3 evidence tasks

Supported, or an uncertainty that must stay visible?

Choose a response, then judge it against the supplied evidence.

Approved topic 2 and 3 evidence tasks

- A. Observed 31 purple of 40 $\approx 77.5\%$, consistent with the 75% expected
- B. The treatment will work in humans
- C. Strand 2 is TACGGT because A–T and C–G
- D. The optimum pH is exactly 7.0
- E. Daughter cells are genetically identical because DNA was copied before division

- F. supported by the evidence
- G. uncertainty — must stay visible

Approved topic 2 and 3 evidence tasks

OBSERVATION a detail read directly from the supplied source

INFERENCE an explanation built from evidence

JUSTIFY give the evidence-linked reason for a choice

Take one approved evidence task. Under OBSERVED, copy only the relevant feature, value or relationship. Under EXPLAINED, connect that detail to the requested Topic 2 or 3 idea. Compare three supplied responses: one supported, one over-strong and one unrelated. Choose the supported response, annotate the evidence link, and mark any vocabulary or calculation step that still needs retrieval.

Approved topic 2 and 3 evidence tasks

- The approved task wording and source locator remain visible while evidence is interpreted.
- An observation is recorded before an inference so the two cannot be blurred.
- A response choice is justified by a named feature, pattern or calculation from the supplied task.
- Uncertainty is not failure: it identifies the exact concept, word or step to retrieve before the assessment response is final.
- Work through supplied Topic 2 and 3 questions, recording each response and any uncertainty before choosing a final response.

Which response is supported by the supplied evidence, and which uncertainty must remain visible before a final choice?

A response choice is justified by a named feature, pattern or calculation from the supplied task. Uncertainty is not failure: it identifies the exact concept, word or step to retrieve before the assessment response is final.

Approved topic 2 and 3 evidence tasks

Available evidence

The approved task wording and source locator remain visible while evidence is interpreted.

Reasoning move

An observation is recorded before an inference so the two cannot be blurred.

Boundary or next check

Uncertainty is not failure: it identifies the exact concept, word or step to retrieve before the assessment response is final.

Approved topic 2 and 3 evidence tasks

The approved task wording and source locator remain visible while evidence is interpreted. Uncertainty is not failure: it identifies the exact concept, word or step to retrieve before the assessment response is final.

Approved topic 2 and 3 evidence tasks decision lab

Supported

Use a prepared OBSERVED / EXPLAINED frame and select the supported response from three approved options.

Standard

Interpret each supplied source, justify a response with a visible evidence link and revise one over-strong answer.

Stretch

Approved topic 2 and 3 evidence tasks decision lab

Compare two plausible responses, evaluate which uses the evidence more precisely and write a discriminating next check.

Complete a short rotation of approved Topic 2 and 3 evidence tasks. Preserve the task locator, make a response before opening feedback, and record whether the response was written, selected, spoken, signed, pointed to or exactly scribed. For every task, add one evidence link and one uncertainty or limit. Re-attempt one item with a fresh source rather than copying the model wording.

Independent record · Approved topic 2 and 3 evidence tasks

Complete a short rotation of approved Topic 2 and 3 evidence tasks. Preserve the task locator, make a response before opening feedback, and record whether the response was written, selected, spoken, signed, pointed to or exactly scribed. For every task, add one evidence link and one uncertainty or limit. Re-attempt one item with a fresh source rather than copying the model wording.

Use a prepared OBSERVED / EXPLAINED frame and select the supported response from three approved options.

Standard

Independent record · Approved topic 2 and 3 evidence tasks

Interpret each supplied source, justify a response with a visible evidence link and revise one over-strong answer.

Stretch

Compare two plausible responses, evaluate which uses the evidence more precisely and write a discriminating next check.

Trace

The approved task wording and source locator remain visible while evidence is interpreted.

Independent record · Approved topic 2 and 3 evidence tasks

Demand

A response choice is justified by a named feature, pattern or calculation from the supplied task.

Truth

Uncertainty is not failure: it identifies the exact concept, word or step to retrieve before the assessment response is final.

Exit route remains available: pause, use the print pack, reduce visual density or direct an adult. The named learning demand remains available.

Audience receives; Influence changes one next action

Present one response, the evidence detail that supports it and the uncertainty that remains. The adult repeats the response without improving it. Confirm, correct or mark the item for retrieval.

Final check: no result, quote, date, event or pupil wording has been created to make the map look complete. The HTML stores no learner response.
