

PUPIL WORKSHEET

Food-jobs evidence mission

Autumn 1 · Week 5 · Lesson B

Name: _____ Date: _____

Use food information to revise fictional menu models, explaining nutrient jobs and why one food cannot meet every need.

Use this sheet with the lesson. You may point, sign, speak, draw, write, dictate or direct an adult. Keep your first idea so you can show what changed.

1. Read the evidence

Use this reference; do not guess from a food's colour or label it good/bad.

Food card	Some useful evidence
Bread or potato	Starchy carbohydrate gives energy; these foods supply other nutrients too.
Beans or lentils	Protein supports growth/repair; also carbohydrate and fibre.
Carrot or apple	Fruit/vegetables supply differing vitamins, minerals and fibre.
Water	Helps transport and temperature control; no food energy.

2. Improve the bread-and-water model

Write, draw, point or dictate as agreed with your teacher.

Keep bread and water. Add cards to show a wider range of food jobs. Choose from beans, lentils, carrot and apple.

- My added cards: ____.
- The first addition helps because ____.
- The second addition helps because ____.
- One need this simple model cannot fully show: ____.

3. Make the second model meat-free

Write, draw, point or dictate as agreed with your teacher.

Original fictional case: meat, rice and vegetables. Keep rice/vegetables and replace the protein-source card.

Version	My replacement	Body-job evidence
First meat-free version		
A different workable version		

4. Revise and explain

Write, draw, point or dictate as agreed with your teacher.

Check a choice against the information table. Keep your first version.

- My first choice or reason: ____.
- My improved choice or reason: ____.
- The evidence that helped: ____.
- Exit: why do bodies need a range of nutrients?

Choose a response route

Agree one route with your teacher; you do not need every route.

Supported

Choose two cards with adult-read evidence and point to a reason; direct one revision.

Standard

Build both fictional cases and explain two food jobs and a revision.

Stretch

Compare alternatives and explain why one food or one model cannot cover every need.

Next: the current Week 6 lesson.
