Practical jobs and recording

White standard edition

Horticulture: soil, seeds & planting.

Practical job list

1 Prepare the tray, adult-checked small samples, gloves and a clean blunt tool.

2 Look at the soil sample. Note colour, lumps and visible pieces.

3 If comfortable, gently rub or press the lightly damp sample. Use gloves or a tool, or watch the adult model. Do not sniff or blow it.

4 Compare the soil sample with the prepared growing medium. Choose the adult-approved medium for the planned indoor pea tray and give a reason.

5 Record one observation and your one-line choice in your book.

6 Park and return tools, clear the surface and wash hands with soap and water.

You may use a sight-only, tool, label or recorder role. Ask for a quiet pause after parking your tool.

Sample check prompts

Use short observations in your book or tell an adult what to scribe.

Check	What I notice	Useful limit
Sight	Colour / pieces / lumps	Colour does not prove fertility.
Texture	Gritty / smooth / crumbly / sticky	A clue, not a full soil test.
Moisture	Dry / damp / wet	Check with adult guidance.

My medium choice

I chose ____ for sowing because ____.

Use the checked material supplied by the adult. No unknown sample is needed.
