Practical jobs and recording

White standard edition

Horticulture: soil, seeds & planting.

Practical job list

1 Prepare the checked seeds, clean draining tray, catch tray and adult-portioned growing medium. Choose a practical job.

2 Add the prepared medium. Leave space below the rim and make the surface even without packing it hard.

3 Use the blunt guide to sow pea seeds 2.5 cm deep and 2.5 cm apart. Count the seeds actually sown.

4 Cover gently. Water as the adult shows until evenly damp; allow extra water to drain into the catch tray. Do not leave the tray standing in pooled water.

5 Add the crop type, the sowing date and a tray code. Agree the care rota and make the first growth-record entry.

6 Let the adult place the tray in a safe bright position. Park tools, clear the surface and wash hands with soap and water.

No tasting or eating. An observer, label or recorder role is valid; record your actual contribution.

Label and care rota

Copy a clear label: crop type garden pea; tray code ____; sown Wednesday 6 January 2027, P6. Do not use pupil names.

Check point	Responsible role	Care
After sowing	Pupil job code ____ Adult checks	Check label, moisture and safe position.
At each lesson	Checker code ____ Recorder code ____	Check before watering. Record what is seen and care given.
Between lessons	Adult backup	Check daily and provide agreed care, including absence and nonteaching days.

Adult backup covers every day. Checking does not automatically mean watering. Record care in the Week 1 to Week 5 log.

My contribution

I helped with planting by ____.
