Practical checks and crop choices

White standard edition

Seasonal growing & plant care.

Practical job list

1 Choose a job. Find the original tray code and check the pea tray by sight or with the adult.

2 Check light and moisture. Give only the care needed. Record no water needed when that is true.

3 Measure the approved accessible space or clean empty containers. Use the real facts supplied by the adult.

4 Read the calendar. Choose two crops that could fit the space and name a reason. Mark unconfirmed choices provisional.

5 Add the actual Week 2 growth entry. Keep the original tray code and earlier entries. Record any move or support.

6 Park and return tools. Clear spills and wash hands with soap and water. Confirm the adult care backup.

No tasting or eating. You may observe, measure, point or record. Ask for a quiet pause after parking tools.

Practical checks and crop choices continued

White standard edition

Actual space facts

Use short notes in your book or tell an adult what to scribe. The adult confirms these facts.

Check	Our actual space
Usable area or container size	____
Light and safe position	____
Drainage and water access	____
Adult care cover	____

Our two crop choices

I chose ____ and ____ for our space because ____.

Confirmed / provisional
A check still needed: ____

Week 2 growth entry

Count actual shoots. Measure the same marked shoot from the medium surface in centimetres, if visible. Record moisture, actual care and any change of pot or support. No growth or no water needed are valid records.
