Growing area maintenance knowledge

Pink supported edition

Maintaining a growing area.

Regular checks

Look for unwanted plants.
Check moisture and drainage.
Look for pests or damage.
Check paths, edges, labels and tools.

Safe care

The adult identifies weeds first.
Keep crop roots safe.
Check before watering.
No water needed can be correct.

Look and report

An insect is not always a harmful pest.
Report what you see.
Do not touch unknown plants, fungi or animals.

Agree a rota

Choose the job, check time, role code and response.
Read the plan back and agree it.
Adult backup checks daily, including absence and other days.

No action needed is a valid record.
Do not invent a problem to create a job.
