Finish and present our horticulture work

White standard edition

Horticulture outcome.

Practical job list

1 Find your actual records and original tray and shoot codes.
2 Check units, method and any gaps. Recheck a current measure only if safe.
3 Choose one finding and one limit to show.
4 Check the group calendar against actual crop choices and conditions.

Count whole expanded pea leaves at the main stem, not leaflets or tendrils. If earlier leaf counts were not recorded, leave them unavailable.

The guide is one possible route. Do not present it as the group’s completed plan.

Finish and present our horticulture work continued

White standard edition

Finish the actual calendar

Crop choice	Our checked calendar
Crop A ____	Sow ____ Plant out ____ Harvest ____ Space and conditions ____
Crop B ____	Sow ____ Plant out ____ Harvest ____ Space and conditions ____

Adult space and care checks confirmed / provisional
A check still needed ____

My short presentation

My records show ____. Our calendar choice is ____ because ____.

One limit or care point is ____.
Use a private exchange, pointing, a short spoken account or scribed words. You do not have to speak to the group.

Keep earlier evidence. Staff review each weekly outcome separately. Park tools and wash hands after handling.
