Teacher and cover planner

Choose and show a strategy

Wednesday 10 February 2027 · P1 · 40 minutes · Year A

BUILD · three to four learners · Spring 1 Week 6 · assessing week

Theme Resilience & Change. Six-week term; final week.

Thread tags: SMSC S/So (M/C none); British Values IL/MR (D/RL/T none).

Exact outcome

Show a coping strategy in a real situation.

Source: owner brief, BUILD Weekly Spring row 69. The six outcomes are checked against accepted lesson packs. The workbook was not reopened; no independent cell check is claimed.

What this lesson assesses

Observe actual familiar strategy steps or a selected help request in three mild practical contexts. Choice or explanation alone is not shown use. The circuit is structured classroom practice. Do not infer spontaneous or generalised real-life coping; the real-situation element requires specific naturally arising or dated prior evidence. Being upset is never required.

Prepare

Prepare dated prior evidence references before teaching. Have books, familiar strategy cards, two plain tidy/draw cards, two plain task cards, usual aids and agreed supervised help/pause route. Support Cards pages 1–2 give five familiar options; page 3 gives the station stories; page 4 is the pupil keep card; pages 5–6 hold seven aid sets. Evidence Sheet has pupil guide, six-outcome grid and TA circuit record.

Where this leads

This helps me use a safe step or ask for help with a new task or job.

Forty minute sequence

Chunk	Minutes	Teaching
Chunk 1	0–12	3 min starter; 4 min familiar choices; 4 min model/check; 1 min reset.
Chunk 2	12–25	5 min station preview; 3 min private hinge; 4 min choice/plan; 1 min reset.
Chunk 3	25–40	9 min TA opportunities; 3 min own check and NS/reply; 3 min exit/grid update.

12/13/15-minute chunks; two one-minute resets are inside forty minutes. Offer up to three short opportunities. Fewer stations, pass, stop or observer role are valid. Do not rush the small group.

Teaching and response routes

Chunk 1

0–3: read the calm change-of-plan story. 3–7: recall the five familiar school-agreed strategies. 7–11: model one actual routine or help request and distinguish it from merely picking a card. Check privately in usual mode. No one has to feel upset. 11–12: quiet reset.

Chunk 2

12–17: preview the three mild contexts and practise supported steps. Explain the circuit order in advance. The noisy-room story stays in an ordinary quiet room. No surprise plan change, loud noise or hard task is created. 17–20: main hinge B, then parallel A if needed. 20–24: choose and plan one starting strategy with aids. 24–25: quiet reset.

Chunk 3

25–34: TA offers private short station opportunities. Other pupils use neutral cards/book plans. Record actions, exact context, aids and content prompts. Stop or reduce opportunities as needed. 34–37: pupil gives their own optional helpfulness check, keeps the card and responds to one next step. 37–40: private exit and specific adult grid update; finish records using prepared prior references.

Supported

Model one familiar strategy first, offer two safe choices and return the action/choice to the pupil. Keep all aids; prompt as needed and record cues accurately. Respect stop/pass. Reduced station count is valid.

Independent

Keep all aids and normal access. After general cue, learner chooses and actually shows a familiar safe strategy; record any adult next-step content prompts. Apply Week3 independence only to actual unprompted calming routine use, not to copied plans or TA-led steps.

Aspire

Keep all aids. Show a suitable strategy and suggest another safe option if unhelpful, or explain what help the story pupil could ask for. No extra station, writing, personal account or demand to feel calm is required.

Worked example and fade

Model a small hand move in the usual safe position: open softly, close softly, rest. Keep the step card and model visible. Offer two familiar choices for supported practice. For a later observed try give a general cue and fade next-step content cues only. Normal aids stay. Prompted teaching and later action are recorded separately.

TA focus

I do: show an actual step; state no upset is needed. We do: preview without noise or frustration and mark rehearsal as teaching. Independent: log actual use/request, context, mode, aids and cues. Pass is valid. Use only specific evidence for the grid.

Aids for each task

All routes retain each bank, starter and visible model, strategy card and usual aids. These seven sets also appear on Support Cards pages 5–6.

Story starter

Words: pupil, change, cross, help

Start: The story pupil could try ... .

Model: The story pupil could try a small hand move.

Model check

Words: choose, show, step, help

Start: They show the step by ... .

Model: They show a small hand move: open softly, close softly, rest.

Guided circuit practice

Words: breath, move, help, space

Start: For story ... they could ... .

Model: For the noisy-room story they could ask for agreed quiet space.

Private hinge

Words: card, show, try, help

Start: We need to see ... .

Model: We need to see the chosen safe steps, not just a card choice.

Choose and plan

Words: choose, step, stop, adult

Start: In the story, they will try ... .

Model: In the story, they will try soft breath at their own pace.

Show and own check

Words: try, stop, help, sure

Start: They showed ... . My check is ... .

Model: They showed a hand move. The help tick is their own choice.

Feedback and exit

Words: next, help, adult, card

Start: A next safe step could be ... .

Model: A next safe step could be to ask a trusted adult.

Prompt ladder

1 Point to the place or instruction. 2 Ask a short question privately. 3 Rephrase. 4 Provide a scaffold or choice. 5 Model the first step only, then return the task. Allow processing time. Separate normal access from adult next-step content cues in the record.

Checks and planned access

Success criteria

Choose a safe familiar strategy.

Show the chosen steps in the usual safe way.

Show or choose a next safe step if needed.

Check after the model

Ask what was actually shown. Pointing to a strategy card is a choice. A visible familiar routine, or a chosen help request actually conveyed to the TA, shows use in that context. A scribe can preserve chosen words or feedback but cannot perform a physical routine for the learner.

Main hinge and decision rule

B fits: show chosen safe steps or make the selected help request. A only points to a card. Check privately through usual access. If A or unclear, re-model choice versus action and use the parallel. A pass is not misunderstanding.

Parallel hinge

A fits: choosing a hand-move card without moving shows a choice only. B wrongly claims use. Recheck privately with aids; keep unsupported claims out of the record.

Cognition and Learning

Explicit short modelling, strategy steps visible, small card set and two-choice support. Repeat only one familiar routine if useful. Fade adult answer/step cues while retaining all aids.

Communication and Interaction

Wait time, familiar aid, pointing, exact voicing/scribe and readback for choices/reflection. Actual physical routine cannot be scribed. No demand for speech or eye contact.

SEMH

Predictable mild story-only circuit, pre-explained order, no emotional trigger questions or public performance. Pass/stop/observer role, quiet pause and supported return; never require upset before practice.

Sensory/Physical

Ordinary quiet room, usual safe position and agreed aids. No added noise or forced movement/breath pattern. Choose an alternative familiar strategy if a sensation/action does not suit.

EAL

Plan in any language. Explain strategy, show, help and change with short examples. Usual language support can convey the pupil's own choices; record exact support.

Optional private story checks

F: Which familiar safe card could fit this story? M: What did the story pupil actually show? H: What else could they try if it did not help? Use only fictional checks; pointing and pass remain valid.

Misconceptions

Choosing or describing a step is not actual use, independence or proof it helped. A pupil need not be upset, complete all stations or share a real worry. Record actual actions, support, own feedback and observation gaps honestly.

Evidence and private support

Six outcome grid

Evidence Sheet page 2 has six verbatim outcomes, initially unticked, with Shown / With help / Not seen and comment fields. Use specific dated work and source references. Do not tick all six from one performance. Week 3 independence needs actual calming-routine use without next-step content cues, with normal aids retained. If absent, mark that requirement Not seen and describe supported progress.

Real situation requirement

The circuit is a structured simulation. Its actual actions show demonstration in that context only. For Week 6, leave real-situation use Not seen unless a naturally arising safe relevant classroom situation or specific dated prior record shows actual use. Note date, context, observed action and support. Never create distress or seek a personal worry to obtain evidence. Ordinary calm real situations are valid.

TA observation and own feedback

Evidence Sheet pages 3–4 separate station A/B/C, context/date, chosen strategy, actual action/request, mode/aids, adult content cues, status and next opportunity. A request for space does not prove space use. Exact TA voicing is access, not independent speech. The pupil's Yes / A bit / No / Not sure is optional and distinct from observed use. No positive tick is prefilled.

Safe routines and supervision

Use only familiar school-agreed options with existing adaptations. Soft breath has no hold, forced depth/rate or timer pace. Look/count uses ordinary quiet surroundings and safe contact points; no added noise, unfamiliar objects or touching another person. Hand move has no force or range target. Help/space uses known trusted adults and the already agreed supervised route. Stop/change if uncomfortable.

Safeguarding and pupil card

If a pupil cannot identify a trusted adult or safe support, support privately and do not press. Offer a familiar school role and help make contact through the school route; accept a blank card or pass. Any disclosure goes to the safeguarding lead through school procedure. Listen calmly, reassure, do not probe or promise secrecy. Follow urgent school procedures where needed. Do not write disclosure details in this pack, a pupil card, book task or shared learning evidence. Private pupil cards are not collected, photographed or displayed for assessment. Staff support a card only with pupil agreement; pupil keeps it.

Feedback and marking

VF verbal feedback; WS worked with support; I independent; NS next step in green; // self-edit; ? read this back to me; E actual evidence banked; R responded. R only when Voice and Audience are present, one NS is set and the pupil responds in the same colour, on the same page or usual mode. Offer to the Communication portfolio; staff confirm mapping.

Book first and scope

Book/usual aids record only chosen plans and learning responses. The private My strategy that works card is the intentional fill-in exception; pupil keeps it. Its title is not a claim of guaranteed success. No names, real worries or card contents in shared evidence. Plan in any language. Only BUILD Week 6 authored; no later strand built.
