Staff answers and teaching notes

Outcome and boundaries

Show a coping strategy in a real situation. A short practical scenario circuit in a calm room. The contexts are invented and mild; the chosen safe strategy action is actually shown. No added noise, surprise changes, frustration test, demanded big feeling or real personal worry. One familiar strategy may fit all three; no requirement to use all strategies, finish all stations or stay if uncomfortable. Pass, stop, observer role and supported return are valid. Use up to three short private opportunities with the TA; record fewer if needed, never rush or invent completion. Other pupils revisit neutral strategy cards/book plans.

Familiar choices

Soft breath; look and count; small hand move; ask a trusted adult; ask for agreed quiet space. Use only already familiar school-agreed versions and established access. This is an assessing week, not the introduction of a new coping protocol.

Soft breath

Only the familiar school-agreed comfortable breathing routine. No holding, forced depth, phase counts, prescribed rate, eyes-closed demand or timer pacing. Stop/change if uncomfortable.

Look and count

Retain Week 3 familiar, authored 3–2–1 noticing routine and usual sensory access. No added noise, taste, smell, unfamiliar objects or touching someone. If any part is unsuitable, choose another familiar strategy or agreed adaptation.

Small hand move

Use familiar agreed small movement and existing physical/sensory adaptations. No force, tight grip, stretch/range target or physical performance grade.

Ask a trusted adult

Known trusted school role and usual safe route only. TA responds to the actual selected request; words may be voiced exactly as chosen through agreed access. This is not a personal disclosure. Do not infer independent spoken speech from TA voicing.

Ask for agreed quiet space

Only the already agreed supervised pause/quiet-place route. Do not send learner away alone, imply secrecy or remove usual supervision. It is valid to show the request while TA confirms next step; do not invent actual space use if it was not observed.

Actual use

A selected card, explanation, copied plan or intention alone does not show a strategy. Observe actual familiar routine steps, a real selected help request through usual mode with TA response, or agreed supported pause use as applicable. Record precisely what happened, including a request without actual space use. If no action is seen, record not observed. An exact adult scribe/voicing can convey the learner's chosen message; it cannot substitute for physical routine action or prove independent spoken speech.

Stations and checks

A A change of plan

A pupil thought the class would draw first. The new plan is to tidy first, then draw. The pupil says, 'I feel cross.' In a calm, pre-explained activity, show two plain cards for tidy and draw. Learner may show an agreed familiar strategy, then place/point to the new order if they wish. No surprise actual plan switch or induced disappointment. Example: The story pupil picks small hand move, shows the soft steps in their usual safe position, then points to tidy first.

B A noisy room story

Lots of people talk in a room. A pupil wants a calm moment. Read/show the story in the ordinary quiet room; no sound playback or raised voices. Learner may enact a familiar routine or use their normal mode to request the agreed supported quiet-space/help route. TA acknowledges and follows usual supervision. The story noise is never created. Example: The story pupil selects the quiet-space help card and shows it to the TA. The TA confirms the agreed supported route. Record whether the request only or actual supported use was observed.

C A task feels hard

A pupil looks at a new task. They say, 'I am not sure how to start.' Offer a very short familiar task such as placing two plain cards in a row, already explained and optional. Do not set a genuinely difficult/frustrating task. Learner can ask TA for first-step help or show another familiar coping step in ordinary calm conditions. Example: The story pupil chooses a teacher/TA role, selects Can you show the first step? with their usual aid, and the TA models one card only. Record actual request and support.

Model check

Choice or explanation alone is not actual use. A routine action or chosen help request must actually be shown. Record supported request versus actual quiet-space use precisely. TA voicing preserves the learner’s chosen words; it does not show independent speech.

Main and parallel hinge

Main B: show the steps or make the selected request. A only points to a card. Re-model choice versus use if needed. Parallel A: card selected with no hand move is choice only. B wrongly claims use. Check privately through usual aid; pass remains unobserved.

Misconceptions

Choosing or describing a strategy proves it was used independently or works. Observe the actual action/request and record access and prompts. Own helpfulness report is separate. Yes/A bit/No/Not sure are all valid, with no guarantee of calming.

The pupil must be upset, finish every station or share a real worry for assessment. Use ordinary calm, invented mild contexts. No induced distress, noise or frustration. Pass, stop and fewer stations are valid. Record exact context and no observation honestly; real-life use is not inferred from simulation.

Assessment and private support

Six outcome grid

Six verbatim outcomes, initially unticked, with tick choices for Shown / With help / Not seen and a comment field for date, context, what was actually seen, access/prompts and source of earlier evidence. Do not tick all six from one performance. Prior evidence must be a specific dated record, never invented. Week3 independent requirement and Week6 real-situation requirement need explicit evidence in their comments; if absent, mark Not seen for that requirement and describe supported/simulation progress. A pass is not failure. No personal worry, private card contents or names.

Real situation requirement

Keep the exact outcome. Record structured classroom simulation separately from a naturally arising real situation or a specific dated prior observation. Actual strategy steps shown in the circuit are evidence of a demonstration in that context; they do not by themselves prove spontaneous real-life coping or meet the real-situation element. For row69, comment clearly when only simulation was seen and leave real-situation use not yet observed. If a naturally arising safe relevant classroom situation or prior dated record supplies evidence, note context/date and actual observed use without inducing distress or requesting personal disclosure. Real situations can be ordinary and calm; being upset is never a requirement.

Independent calming use

Keep word bank, sentence starter, visible model, strategy/help cards and usual aids for all routes. For Week3 independent-use evidence, after general task cue the learner selects, starts and follows a familiar calming routine without adult next-step content prompts. Reading/communication/physical access and visual cue stay; log any content prompts separately. Prompted practice is valid teaching/evidence at that support level, not independent use.

Records and private support

Evidence record

One adult circuit record with three station entries A/B/C: date, structured/naturally arising/prior context, chosen familiar strategy, actual action/request seen or not seen, usual access, adult content prompts, shown with aids/no next-step cues / shown with content cues / not observed, stop/pass, own helpfulness if freely offered, next opportunity. Keep identity blank/generic for local staff record; no name in published pack. Do not equate observed quiet-space request with actual space use or adult-voiced choice with independent speech.

Own helpfulness

Yes / A bit / No / Not sure are equally valid. Leave all choices blank until the learner chooses. A scribe marks only an exact selected response and reads it back. No positive adult assumption or requirement to calm down.

Private card and safeguarding

If a pupil cannot identify a trusted adult or safe support, support privately and do not press. Offer a familiar school role and help make contact through the school route; accept a blank card or pass. Any disclosure goes to the safeguarding lead through school procedure. Listen calmly, reassure, do not probe or promise secrecy. Follow urgent school procedures where needed. Do not write disclosure details in this pack, a pupil card, book task or shared learning evidence. Private pupil cards are not collected, photographed or displayed for assessment. Staff support a card only with pupil agreement; pupil keeps it.

Feedback and marking

VF verbal feedback; WS worked with support; I independent; NS next step in green; // self-edit; ? read this back to me; E actual evidence banked; R responded. R only when Voice and Audience are present, one NS is set and the pupil responds in the same colour, on the same page or usual mode. Offer to the Communication portfolio; staff confirm mapping.

Scope

Only BUILD Spring 1 Week 6 authored. Assessing week, Wednesday 10 February 2027 P1, Year A. Six-outcome parenthetical labels occur only in exact outcome rows; no separate named campaign resources. No later strand built.
