

An accurate Earth Day campaign

Pupil resources | LAUNCH Humanities Summer 1 Week 4

Create a digital sustainability campaign linked to Earth Day.

Authored teaching picture

Use the evidence cards and blank spaces to give your own response. Speak, point, draw, type or write.

Start here: a claim needs evidence. A request asks someone to act. The cards give the date, classroom brief and action, even if earlier work is missing.

Evidence cards

Check the source and limit before using a detail

A Earth Day and our audience

Earth Day is observed on 22 April. Our product is a classroom digital message for school users. Name one feasible action and its intended effect. Keep it on the school-approved classroom device; do not create accounts or publish it online.

Source: EARTHDAY.ORG History; authored classroom brief

Limit: The date does not prove that a campaign action has worked.

B A supported climate link

NASA explains that burning fossil fuels releases CO₂, which contributes to warming. A campaign may explain that link with a citation. It must not turn a small proposed action into a promise to stop climate change.

Source: NASA Causes; authored campaign application

Limit: This source does not calculate a CO₂ saving for a school paper tray or a particular campaign.

C Weak drafts to repair

AUTHORED EXAMPLES, not facts: This will stop climate change. Our tray has already saved a tonne of CO₂. Both go beyond the supplied evidence. Repair the claim, name the audience and action, and state what you will measure.

Source: Authored weak-draft examples, 21 September 2026

Limit: These are deliberately unsupported claims for editing, not estimates to repeat.

D An honest action message

AUTHORED PLAN: invite school users to choose clean spare paper for suitable drafts, with teacher permission. Count new sheets issued for the same task before and during a short trial. Explain the intended effect as reducing new-sheet use, then check it.

Source: Authored campaign and measurement plan, 21 September 2026

Limit: No guaranteed result or carbon saving is supplied. Include no pupil names, faces or personal details.

Arrival task

Supported

Start here: a claim needs evidence. A request asks someone to act. The cards give the date, classroom brief and action, even if earlier work is missing.

1 When is Earth Day?

Help: Read card A.

My response

2 Who is our message for?

Help: Use the classroom brief.

My response

3 Can we claim the tray has saved a tonne of CO₂?

Help: Check for a measurement on card C.

My response

4 Where is the message kept?

Help: Read card A.

My response

Arrival task

Standard

Start here: a claim needs evidence. A request asks someone to act. The cards give the date, classroom brief and action, even if earlier work is missing.

1 What makes the first weak draft an overclaim?

Help: Compare the promise with evidence.

My response

2 What feasible action does card D propose?

Help: Read the invitation.

My response

3 What indicator can check that action?

Help: Use the counting plan.

My response

4 How do a claim and a request differ?

Help: Compare says with asks.

My response

Arrival task

Stretch

Start here: a claim needs evidence. A request asks someone to act. The cards give the date, classroom brief and action, even if earlier work is missing.

1 Why is intended effect different from proven effect?

Help: Consider when the trial happens.

My response

2 Why must a campaign cite a source precisely?

Help: Ask whether it supports that claim.

My response

3 What must be removed from an unsafe draft?

Help: Use the classroom rules.

My response

4 How can a qualification improve a message?

Help: Think about honest scope.

My response

Shared investigation

Use the evidence; explain and check together

1. Repair both AUTHORED weak drafts in the editor. Replace each overclaim with a feasible action, supporting evidence and a measurable intention.
2. Identify school users as the audience. Prepare a classroom-only Earth Day message with a source, intended effect and a clear limit.

AUTHORED WEAK DRAFT: This will stop climate change

Audience and feasible action

Classroom product only. No real posting, accounts, pupil names or faces. Earth Day: 22 April (EARTHDAY.ORG).

Independent task

Supported

Create a digital sustainability campaign linked to Earth Day.

1. Choose school users as the audience and highlight one feasible action from card D.
2. Make a digital message on the approved classroom device using the supplied frame.
3. Independently explain its intended effect and check one claim against its source.

Help: Use highlighted evidence and the frame. An adult may read or scribe your own words.

Audience and proposed action

Supported claim and source

Intended effect and indicator

Accurate final classroom message

Further challenge: Explain a second detail if ready.

Independent task

Standard

Create a digital sustainability campaign linked to Earth Day.

1. Repair the two drafts and plan a message for a stated school audience.
2. Create a classroom digital message with Earth Day's date, a feasible action and a named source.
3. Independently explain the intended effect, indicator and one limit on your claim.

Help: Use the cards and organiser. Choose your own evidence and explanation.

Audience and proposed action

Supported claim and source

Intended effect and indicator

Accurate final classroom message

Further challenge: Compare your reasoning with one alternative.

Independent task

Stretch

Create a digital sustainability campaign linked to Earth Day.

1. Audit both drafts for evidence gaps and implied promises.
2. Create a concise classroom message that separates evidence from a request to act.
3. Justify the audience, action, intended effect and indicator using source limits.
4. Independently revise one phrase after a peer accuracy check and explain the revision.

Help: Use the source limits and test a different priority or assumption.

Audience and proposed action

Supported claim and source

Intended effect and indicator

Accurate final classroom message

Further challenge: Propose a further evidence check and explain its value.

Exit tickets

Use your chosen route and give your own response

Supported

1. Give your audience and proposed action. Use a named detail and your own explanation.

2. Which source supports one claim? Use a named detail and your own explanation.

Standard

1. Explain your message's intended effect. Use a named detail and your own explanation.

2. How did you repair an unsupported claim? Use a named detail and your own explanation.

Stretch

1. Why does your evidence justify that wording? Use a named detail and your own explanation.

2. What measurement could test the intended effect? Use a named detail and your own explanation.
