Teacher and Cover Plan

Describe the Sun, Earth and Moon as approximately spherical bodies.

At check-out, record E for using evidence to explain why Earth is approximately spherical against the pupil's target.

Stage timings

Stage	Minutes
Arrival	4
Starter	4
I do	8
We do	9
You do	8
Review	4
Exit	3

Total: 40 minutes

Preparation

Large ball, an ordinary torch, a white card and a flat disc of stiff card. Printed evidence cards and a book or response sheet.

Use a large ball, steady torch and white card. The adult aims the torch at the card, never at faces. Keep a lit route around the room. Do not ask pupils to look at the real Sun.

Success criteria

- Describe the Sun, Earth and Moon as nearly ball-shaped.
- Link one real observation to a curved or ball-shaped Earth.
- Choose the strongest evidence and say why it is stronger than another clue.

Return to learning · Use the individual pause plan, give space, then return to the last secure step and one structured choice. Correct privately.

Teaching and cover guidance

Stage	Teaching and check
Arrival	Ask pupils to point to the hull or mast before judging their science. Give thinking time. Accept a pass and offer a private response.
Starter	Separate what was seen from what it means. Keep “circle” for a flat shape and “sphere” for a 3D shape.
I do	Use a large ball, steady torch and white card. The adult aims the torch at the card, never at faces. Keep a lit route around the room. Do not ask pupils to look at the real Sun.
We do	Give one card at a time if useful. Hear a reason before checking. If the checkpoint is insecure, turn the flat disc edge-on and ask for a fresh prediction.
You do	Offer the frame or usual response mode as needed. Record access support separately from a science cue.
Review	Give one specific feedback point. The pupil improves the same work under My response. Check it and tick or write R.
Exit	Hear one science response and invite pupil voice. A pass is valid. Use what you hear to keep a helpful support or make one change next time.

Feedback loop

VF □ WS □ E □ NS + … □

Give one specific feedback point. My response is the pupil’s improvement to the same work.

Adult checks the response and ticks it, or writes R (Pupil responded to feedback).

Exit pupil voice

What helped you most today, or what would you change next time?

Point, say, sign, draw, write or choose. You may pass.

Return to learning · Use the individual pause plan, give space, then return to the last secure step and one structured choice. Correct privately.

TA Brief

At check-out, record E for using evidence to explain why Earth is approximately spherical against the pupil's target.

We do	9
You do	8
Review	4
Exit	3

Total: 40 minutes

What to do

- Check picture access first. Ask for a point to the hull or mast. Wait, then rephrase. Hear a reason before the reveal.
- Use one card at a time or offer a frame. Keep access support separate from science cues. Follow the pupil’s usual pause and return plan.
- Keep the torch with the adult and aimed at the card. Keep a lit route around the room.

Feedback loop

VF □ WS □ E □ NS + … □

Give one specific feedback point. My response is the pupil’s improvement to the same work.

Adult checks the response and ticks it, or writes R (Pupil responded to feedback).

Exit pupil voice

What helped you most today, or what would you change next time?

Point, say, sign, draw, write or choose. You may pass.

Return to learning · Use the individual pause plan, give space, then return to the last secure step and one structured choice. Correct privately.

Science · GROW · Autumn 2 · Week 2 · Lesson 2

Staff card

At check-out, record E for … against the pupil's target.

At check-out, record E for using evidence to explain why Earth is approximately spherical against the pupil's target.

At check-out, record E for today's lesson against each pupil's target on the evidence app

Invite a response. Give thinking time. Use the pupil’s agreed mode. The learner may pass.

Feedback loop

VF □ WS □ E □ NS + … □

Give one specific feedback point. My response is the pupil’s improvement to the same work.

Adult checks the response and ticks it, or writes R (Pupil responded to feedback).

Code	Meaning
VF	Verbal feedback
WS	Worked with support
I	Independent
NS + …	Next step
E	Evidence captured
R	Pupil responded to feedback
//	Self-edit point
?	Read this back to me

Return to learning · Use the individual pause plan, give space, then return to the last secure step and one structured choice. Correct privately.

Lesson resource

P17 planning and evaluation

Need	Planned adaptation
Cognition and learning	Reveal one observation at a time. Compare the ball with a flat disc, then ask for a fresh reason.
Communication	Offer a word, picture or choice. Accept pointing, signing, a drawing or exact scribing.
Sensory and physical access	Use an enlarged drawing or let the learner direct the adult’s demonstration. Keep a lit route.
Regulation	Offer a quiet pause and a single next step. Use the individual plan.

Evaluate after teaching

Record the evidence used, the support given, the adjustment tried and what changed. If behind, preserve the model comparison, one independent reason, one revision and the Exit.

P18 individual target opportunities

Use each pupil’s agreed target. Record actual independence, support or cue separately from the access aid. Do this privately.

Opportunity	Possible evidence
Communication	Explains what the hull or the shadow shows in the usual mode.
Thinking and independence	Chooses a stronger clue and gives a reason with the actual level of prompting.
Regulation and participation	Uses the agreed pause or suggests an adjustment within We do.

Starting after an absence

Ask for one picture observation. Use the model drawing and one evidence card before the independent task. Review the actual response once to decide what to teach next.

Staff Answers

Accept scientifically equivalent responses. Listen once in the pupil's usual mode. Separate access from science cues.

Arrival and Starter

Near: hull and mast. Far: mast only. The Sun, Earth and Moon are approximately spherical. Distance alone makes the whole ship look smaller.

I do and checkpoint

The ball casts a round shadow from different directions. A disc may look round face-on and narrow edge-on. Earth's dark shadow has a curved visible edge on the Moon during a lunar eclipse.

We do

Clue	Suggested judgement and reason
Ship at the horizon	Strong. A curved surface hides the low hull first. Distance alone would make the whole ship look smaller.
Shadow during a lunar eclipse	Strong. A sphere makes a round shadow from different directions. A flat disc can make a round shadow from one direction.
Photographs from space	Strong. Repeated images from different viewpoints show the whole Earth's rounded outline directly.
Travel all the way round	Weak on its own. The journey fits a globe, but a closed route by itself does not show the shape of the surface.

Route answers and marking

Accept a different strongest clue when the pupil names the observation, connects it to shape and compares it with a weaker clue. Do not credit a choice without its reason where a reason is required.

Supported

You do. 1 for choosing the eclipse shadow. 1 for linking the curve to a sphere or explaining the limit of a closed route.

Exit. The eclipse shadow. Its curved edge at different eclipses fits a ball-shaped Earth. A trip shows a closed route.

Independent

You do. 1 for a clear observation, 1 for a link to shape, and 1 for a relevant comparison.

Exit. Different viewpoints show the rounded shape repeatedly. One round outline can also be the face of a flat disc.

Aspire

You do. 1 for a defensible choice, 1 for explaining an alternative, 1 for each accurate size comparison and 1 for a valid model limit.

Exit. About 1 cm. For example, the model does not show real distances, sizes, the Sun’s light rays accurately, or Earth’s slight flattening.

Choice

You do. 1 for choosing a stronger clue and 1 for matching a valid reason.

Exit. Repeated space views give a direct view of the rounded outline. The trip gives a route, not a direct view.

Pupil voice

There is no model answer. Listen and use the response to keep a helpful support or make one change.
